SEED

ANNUAL

FAIRFIELD
MATCHLESS
TOMATO.

J. W. JUNG SEED CO.

FAIRFIELD SEED FARM,

RANDOLPH, WIS.

Our Great 25c

Specialty Collection.

Here is a real bargain, one that can't be beat at such a low price. **60 cents worth of seed for only 25 cents.**

6-Full-Sized 10c packets for a quarter as follows.

Cabbage,	10
Danish Ballhead	10
Cucumber,	10
Davis Perfect	10
Lettuce,	10
Wayahead	10
Musk Melon,	10
New Fordhook	10
Onion, Southport	10
White Globe	10
Tomato,	10
Fairfield First	10
Regular value	.60

We make this exceptional offer to induce you to try these special varieties. Sent postpaid to any address for 25 cts.

Seed Crops at Fairfield.

The above illustration will give you a fair idea of the way crops grow on the Fairfield Seed Farm. We could buy many of our seeds for less than half of what it costs us to grow them ourselves, but they would not be Northern Grown.

Ours is the farthest north located seed farm in America, and for **EXTREME EARLINESS, GREAT HARDINESS and IMMENSE PRODUCTIVENESS** our seeds are **UNEXCELLED.**

Crops growing for seed on the Fairfield Seed Farm near Randolph, Wis.

SPECIAL INDUCEMENTS FOR CLUB ORDERS.

HAVE YOUR FRIENDS ORDER WITH YOU. YOU WILL BE DOING THEM A SPECIAL FAVOR BY GETTING THEM THE BEST SEEDS AT A REASONABLE PRICE. FOR EACH NEW CUSTOMER SENT US IN THIS WAY YOU MAY SELECT ANY TEN CENT PACKAGE IN THIS CATALOGUE. SEND EACH ORDER ON A SEPARATE SHEET AND BE SURE TO HAVE THE NAMES AND ADDRESSES PLAINLY WRITTEN.

Jung's UNRIVALED VEGETABLE SEEDS.

In the following list you will find only such varieties as have been thoroughly tested and found to be of special merit. All of our seeds are grown from the finest select stocks and for quality are unexcelled by any others. **WE HANDLE ONLY THE VERY BEST SEEDS and QUALITY** rather than price is our first aim.

25 cents worth of seeds free is allowed for each \$1.00 sent for seeds in packets and ounces. This premium must be selected in packets and ounces and does not apply on orders sent for farm seeds.

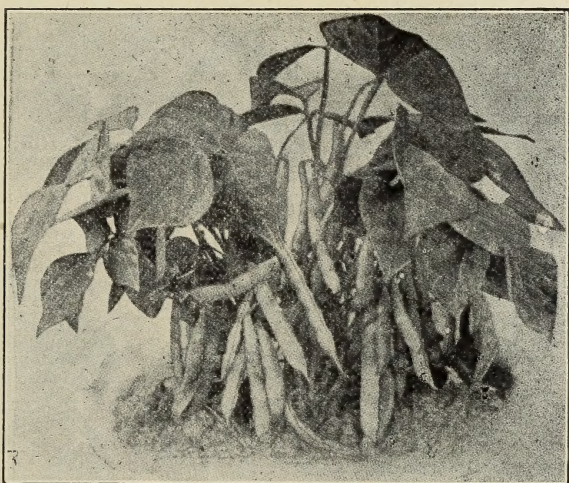

Cultural Instructions. We have prepared a little booklet, "**Success with Vegetables and Flowers**" which contains complete cultural instructions for growing vegetables and flowers. A copy will be sent free with every order if asked for

Asparagus.

Barr's Mammoth.

This is an excellent variety. The stalks are of a green color, almost an inch in diameter from the bottom completely to the tip. They are of quick growth and free from woody fibre. We do not offer seed as the roots give much better satisfaction.

Price one year old roots, 20 cts. per doz. post-paid. Not prepaid 75 cts. per 100.

Jung's Unrivalled Bush Beans.

Our Seed Beans are extra fine!
They were all grown on the Fair-field Seed Farm, were thoroughly rogued, hand picked and are worth much more than the less carefully selected strains as are usually sold.

BURPEE'S WHITE WAX

Burpee's White Wax.

A large white seeded Butter Bean with handsome yellow pods which are absolutely stringless. The plants make strong robust bushes fifteen inches high, with strong branches, which hold the pods well up from the ground and insures them from rusting. The pods are produced in great profusion, measuring from 5 to 6 inches in length, $\frac{1}{2}$ inch broad and are very meaty when ready for table use. As the beans become of good size they can be used as green shell beans for succotash and etc., being very easily shelled, of fine flavor and attractive appearance when served in this way. It is a general purpose variety of superior merit and can be served in almost any way desired.

Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 30 cts.; qt. 45 cts.

Burpee's Stringless Green Pod.

This variety combines the following essential points: extreme earliness, being the first to produce pods, unicolor and entirely stringless even when matured. The pods are from five to six inches long, very round, of a rich green color and of the finest flavor. They are tender, brittle and of the finest flavor. By repeated plantings pods may be had in constant succession from spring until cut off by heavy frosts in the fall. It is without any exceptions the finest green podded bean in cultivation.

Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

Pencil Pod Black Wax.

We consider this one of the best Wax Beans yet introduced. It is very productive, and of most excellent flavor.

The pods are long, straight, and round like a pencil, fleshy and of a bright yellow color, tender, brittle and absolutely stringless. The plants are of true bush growth fifteen inches high, with abundant large foliage. The magnificent pods are from six to seven inches long.

This is one of the best wax pod beans for the home garden. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 40 cts. by mail postpaid.

PENCIL POD BLACK WAX

Brittle Wax.

The plants are very hardy and vigorous, of true bush growth, about fifteen inches high and heavily laden with magnificent long straight round and very solid pods from five to seven inches long. The pods are of a rich golden color, very tender and entirely free from strings at all stages of growth. It will stand longer than any other bean without becoming hard. The pods are unexcelled as snap-shorts, while having white seeds showing only a small black dot at the eye, any pods allowed to ripen will be readily saleable as winter shell beans. Include this grand bean in your order. Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 30 cts.; qt. 45 cts.

The earliest of all Wax Beans. Of such excellent quality it might well be termed "best of all!"

Of such excellent quality it might well be termed "best of all!"

Profusion Wax.

The leaves of this bean distinguish themselves from other varieties by their beautiful willow shape. It is very hardy having withstood frosts which seriously checked other varieties. The bushes are literally covered with the fine transparent yellow pods which are from four to five inches long, remarkably brittle, as it has no strings whatever. It is sure to make a reputation for itself either in the home or market garden. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

CURRIE'S RUST PROOF GOLDEN WAX.

The bushes are strong vigorous growers and bear an immense load of long, flat, meaty pods which are of the most handsome appearance.

Not only does this variety possess the merit of being rust-proof but it is also extra early, while the pods are exceedingly crisp and tender, and of a most delicious flavor. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 45 cts. by mail postpaid.

CURRIE'S RUST-PROOF WAX

BRITTLE WAX

Don't forget that we prepay the postage on all seeds by the packet, ounce, quarter pound, pound, half pint, pint and quart.

If seeds are ordered by express or freight deduct 8 cts. per pound 10 cts. per qt. on sweet corn and 15 cts. per qt. on beans and peas.

The Best Wax Bush Bean.

New Kidney Wax.

Without any exceptions the finest flat-podded wax bean in cultivation.

A great improvement on Wardwell's Kidney Wax, being more robust and prolific, and having longer pods which are much handsomer and of finer quality. The plants are of erect bush habit, reaching eighteen to twenty inches in height. Their thick foliage is free from blight, while the pods are free from rust.

The fleshy pods are flattened in form, six to seven inches long, one-half inch broad, and three-eighths of an inch thick; the color is a rich lemon yellow. The pods are remarkable for their meatiness, fine flavor and absolute freedom from strings.

Plants of this variety have been grown on the Fairfield Seed Farm bearing forty large pods each.

Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 35 cts.; qt. 50 cts.

Wonder Bush Lima Bean.

We have grown this strain for four years and can truthfully say that it is the very best "Bush Lima Bean." It is a great improvement on Burpee's Bush Lima.

While the bushes are fully as productive, the pods are borne more at the center of the plant.

This is a great advantage as the pods are held up from the ground. The bushes grow eighteen to twenty inches high, requiring no poles or stakes whatever.

The pods are of truly mammoth size and contain from three to four large beans each. They are very tender and of the most delicious flavor.

There is nothing quite so delicious in the vegetable line as nice fresh Lima Beans. Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 30 cts.; qt. 50 cts.

See cut.

NEW KIDNEY WAX

The Best POLE LIMA BEAN.

Henderson's Early Leviathan.

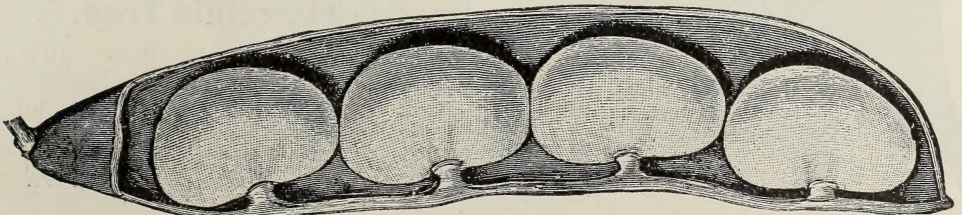

This is the very earliest. It will not only give large lima beans earlier than any other strain, but is also much more productive.

both early and throughout the season. It is a strong grower, clinging well to the poles, and is a sure cropper. The pods differ from those of other early pole limas in being straighter and longer.

The pods hang out from the foliage in large clusters and contain three to four and sometimes five large beans to a pod.

It bears until frost, and a small patch will supply a family. Pkt. 10 cts.; $\frac{1}{2}$ pt. 25 cts.; pt. 35 cts.; qt. 50 cts., postpaid.

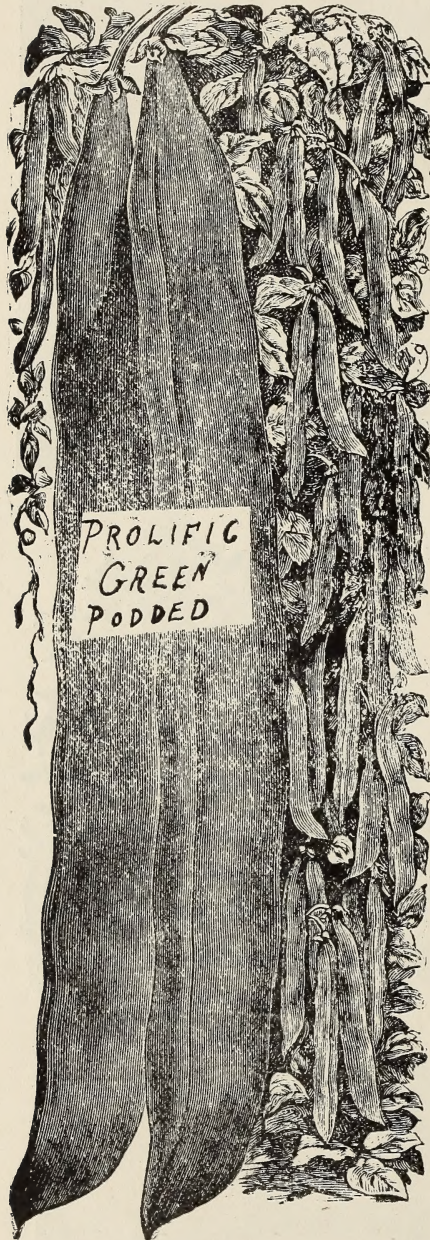

See illustration below

POLE BEANS.

Kentucky Wonder Wax.

The merits of the old Kentucky Wonder Pole Bean are well known. **This variety has all its superb qualities with the addition of a beautiful transparent yellow pod.** It is a rampant grower, one plant filling a pole with vines densely loaded with almost a solid mass of pods from bottom to top. The pods are very large, being from eight to ten inches long, exceedingly tender and very fleshy. The pods are so plump and fleshy that frequently they are of greater thickness than width. Deliciously rich and buttery when cooked. Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 30 cts.; qt. 50 cts.

KENTUCKY WONDER WAX
Prolific Green-Podded.

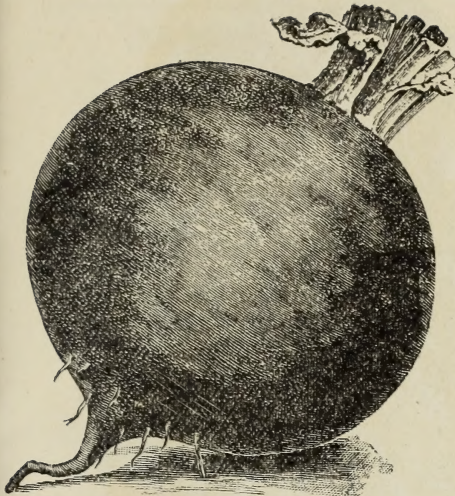

The best green-podded Pole Bean in cultivation. It is earlier than most other varieties and covers a longer season of productiveness. The vines are vigorous growers, being loaded with pods from early in the fall until frost. It is a very sure cropper, even in unfavorable seasons producing large crops. The pods borne in clusters, average six to eight inches in length, are uniformly straight, of a dark rich green, and so meaty as to be nearly saddle-backed. The pods are entirely stringless, very tender and sweet and of mild flavor. The dry beans are of a pearly whiteness. Pkt. 5 cts.; $\frac{1}{2}$ 15 cts.; pt. 25 cts.; qt. 40 cts.

FIELD BEAN.

Improved Prolific Tree.

A Wonderrul, Productive, White Field Bean. It is without doubt the heaviest yielding bean known. It is a sure cropper, and not only more prolific than the common white bean, but also of better quality. Vines are large, spreading, with small thin leaves, and occasional runners. The plants grow upright and bear the pods well up from the ground, thus keeping them away from the soil and making them more easily gathered. Beans are pure white and of small size. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 40 c.

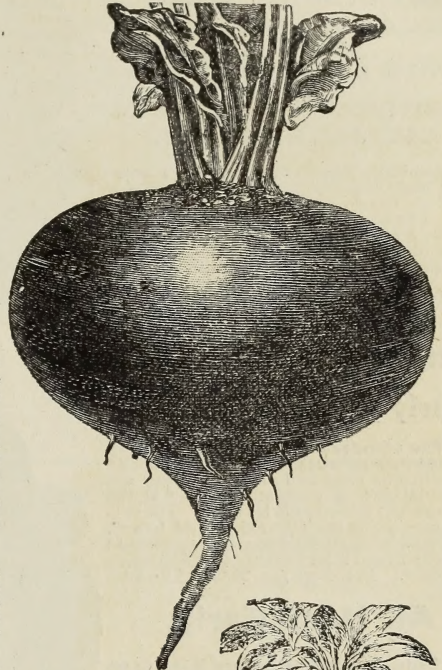

Garden Beets.

EARLY MODEL

Early Model. This splendid variety has attained perfection for table use. It is extremely early, of perfect globe shape and finest quality. It is a fine selection of blood red beet, extremely smooth and of symmetrical growth, fine rich color and desirable shape. The roots of Early Model are of good size and run uniformly perfect, almost round, with small dark crimson colored leaves, and a slim tap-root. It makes a rapid growth and matures very early. In quality and color it is peerless; very fine grained, tender and sweet, never woody or stringy. The tops are small making it a good forcing variety. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 30 cts.

Columbia. An excellent early variety for all purposes. The roots are always smooth, from four to five inches in diameter, and of a neat turnip shape. The flesh is a deep red color and of fine quality, remaining tender until the roots have reached their full size. The foliage is small and of a rich bronze color. The roots can be used early in the season, when only partially grown, being ready for use soon after the Extra Early sorts and of finer quality. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.

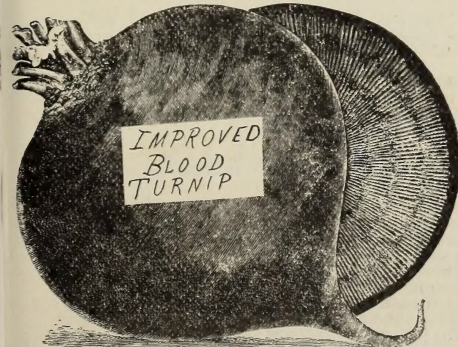

COLUMBIA

Mangels.

Mammoth Long Red. The best mangel for deep soil; large size; wonderfully productive and of superior quality. Specimens of this variety have been produced weighing 50 pounds. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 45 cts. by mail postpaid. **See cut!**

Golden Tankard. A smooth yellow fleshed mangel; the roots are of large diameter, tapering quickly at the bottom, which is quite broad, with only a small tap-root. It grows largely above the soil and is easily harvested. It yields an enormous bulk on good land, and can be closely grown in rows. No root crop is a better paying investment for farmers to grow than Mangels. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 45 cts.

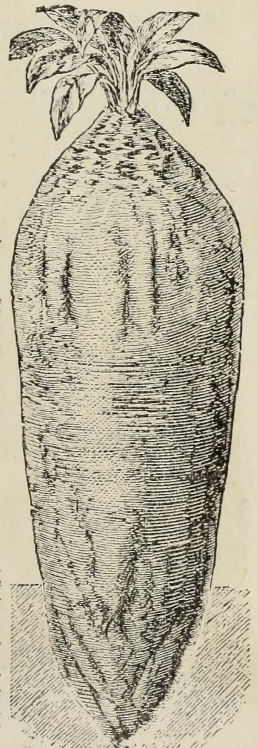

Brussel Sprouts.

Long Island

Improved.

The "sprouts" resemble small cabbages growing closely on the stalk of the plant. They are palatable and nutritious and should be grown in every garden. It may be boiled like cabbage or cooked in cream like cauliflower. They are highly esteemed for boiling during the fall and winter months. This is the finest strain grown on Long Island. Pkt. 5 cts.; oz. 25 cts.

Cabbage.

The Cabbage seed we are offering was grown with exceptional care. Not only are the plants grown from the best stock, but they are also carefully inspected before being set out. There is much poor cabbage seed on the market. **BEWARE!**

Extra Early Express.

POSITIVELY THE EARLIEST CABBAGE ON EARTH.

It produces heads of good size a week to ten days earlier than Jersey Wakefield. There are few loose leaves, and almost every plant forms a head of good size and fine quality. It can be planted close, and yields a large crop. A fine variety for shipping as the heads remain solid for a long time. It is also called "Lightning" and other fancy names by some seedsmen. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.

EXTRA EARLY EXPRESS

Jung's Special Stock

Early Jersey Wakefield.

The standard pointed-headed early cabbage throughout the U. S. The heads are uniformly large and solid. They are pyramidal in form; generally pointed at the end, with but few outside leaves. The outside leaves are unusually thick and heavy, and it is thereby enabled to stand more cold weather without injury when carried through the winter. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.

All Head Early.

This variety has proved itself to be adaptable to a wide range of both soil and climate, and is well worthy of recognition as a standard American sort. It is the earliest of all large Cabbage and considerably larger than any other early summer cabbage. The deep flat heads are remarkably solid and the most uniform in color, form, and size of any variety. Good quality and tenderness are marked features.

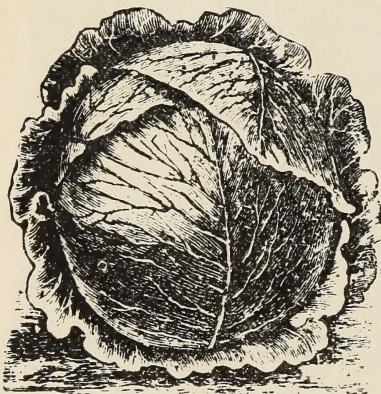

It is suitable for growth in spring and early summer, or for use as a winter sort. Seed sown in July, and plants set in August, will produce good heads for wintering. The hard heads grow so free from spreading leaves that fully one thousand more heads than usual with large cabbage maker for gardeners. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.

ALL HEAD EARLY

Select Varieties of Late Cabbage.

Surehead. A leading late variety. It produces large round flattened heads of the Flat Dutch type, and is remarkable for its certainty to head. The heads are remarkably uniform, extremely hard, fine in texture and flavor, and ordinarily weigh from ten to fifteen pounds each. It has but few loose leaves and is an excellent keeper. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.

SUREHEAD

Short Stem Drumhead.

This variety is extremely uniform in heading, and dwarf in growth, so that a great number of heads can be grown on a small area. The heads appear to rest on the surface of the soil.

It grows with little outer foliage, the leaves all folding in closely about the head which is very solid. It is a standard sort for winter keeping, and sells readily in the winter and spring markets. With good cultivation heads attain a weight of twenty to thirty pounds and are of the finest quality. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts. See cut on next page.

A GRAND HARD HEADED CABBAGE

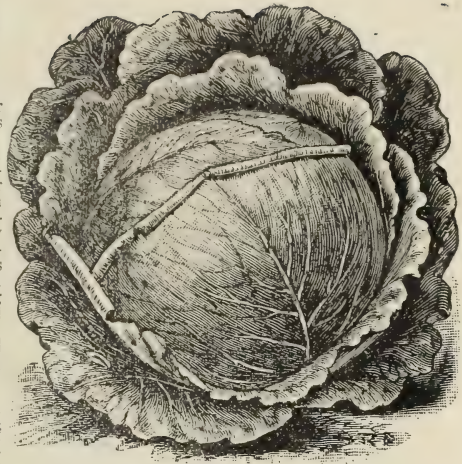

DANISH BALLHEAD.

This type of winter Cabbage has become very popular of late years on account of its unequalled keeping qualities as well as for the great solidity and weight of the heads.

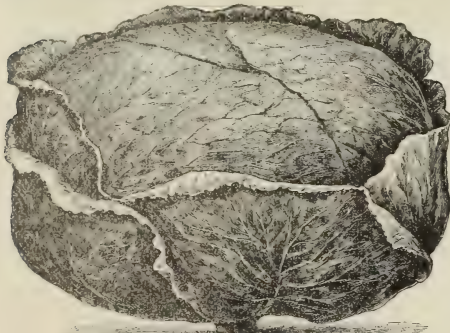

It is strong and vigorous in growth, and produces large, round, compact heads, exceedingly hard and solid, weighing, when trimmed, fully one-fourth more than any other cabbage of equal size; therefore, it keeps in fine condition until spring. For boiling, slaw, sauerkraut, etc., it is unequalled, being crisp, tender and sweet. It seems to grow luxuriantly on all soils and under most conditions, withstanding hot, dry weather, and does not rot from the effects of wet seasons, neither do the heads burst. They keep in finest condition when buried through the winter, coming out solid in spring. It is popular in the markets of all large cities and sell for the highest price.

Our seed is imported from Denmark and is the finest grown. Pkt. 10 cts.; oz. 25 cts.; 1-4 lb. 80 cts.

Red Drumhead. The well known standard cabbage. Heads of large size slightly rounded, and from seven to eight inches in diameter. A valuable variety for pickling; very sweet, tender and of excellent quality. Pkt. 5 cts.; oz. 15 c.

DANISH BALLHEAD.—from a Photograph.

SHORT STEM DRUMHEAD

Perfection Savoy. This is the hardest heading and best all-round Savoy. Plants are of strong growth, having only a moderate amount of outer foliage growing closely about the large solid round heads. It is very sweet and crisp, and always tender. The heads are beautifully blanchied and of the finest flavor. Where quality is desired no other variety can equal the Savoy. Pkt. 5 cts.; oz. 15 cts.

BORECOLE, or KALE.

Dwarf German. Useful for furnishing greens and boiling during the early fall, winter, and spring months. The plants are entirely hardy and the quality is improved by freezing, but plants should not be handled while frozen. The leaves are very curly, bright green, very tender and delicate in flavor. Pkt. 5 cts.; oz. 10 cts.

Carrots.

Our stocks are very true of type, being far superior to the common stock generally offered by most other dealers.

Anyone wishing the best strains should order our seed.

Early Scarlet Horn.

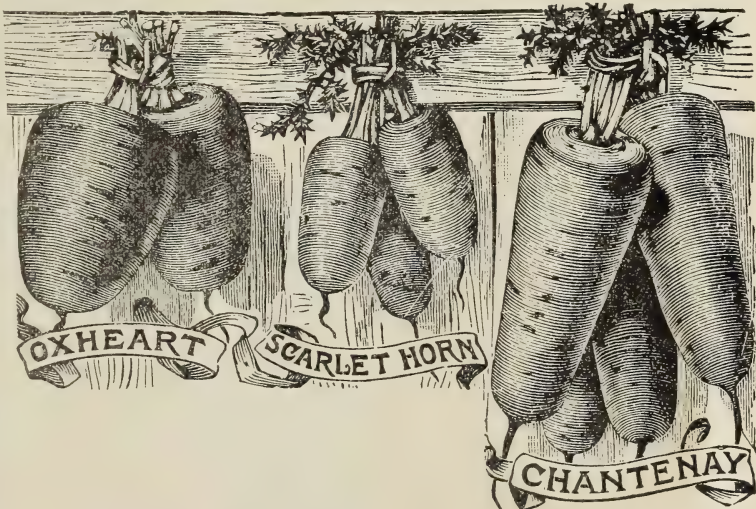

This is a popular early variety, three to four inches long and stump-rooted; it is a favorite for bunching for market and is sometimes forced.

It is not large, but is often used for early crop.

The flesh is fine grained and the color a deep orange.

A fine table Carrot and when pulled young is excellent for soups. This variety has been long and favorably known and is considered by many people to be the best early table sort. Pkt. 5 cts.; oz. 10 cts.; 1 lb. 25 cts.

Oxheart. The most popular and best cropper among the short carrots. If you want an early, handsome, ready

selling carrot this sort will suit you. It runs fully three to four inches in diameter, and specimens have been raised measuring seven inches in diameter.

The quality is extra fine and satisfactory for home or market use. Oxheart can be easily pulled, which makes the harvesting easy and inexpensive. It yields a heavy crop and can be grown on hard, rocky ground. Always of a good shape and rich orange color.

Flesh fine grained with little or no core. Pkt. 5 cts.; oz. 10 cts.; 1 lb. 25 cts.

CARROT.

Chantenay. This variety is desirable in all respects; it is stump-rooted and therefore very easily dug.

Roots are very smooth, fine in texture, and of a beautiful orange color. For table use it is considered by many to be best of all, both on account of shape and quality.

The flesh is very tender when cooked. Although this is a medium early sort, it furnishes roots of usable size as early as any variety.

It is a heavy cropper and undoubtedly one of the best sorts for both the market and home garden. **See cut on page 9.**

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

CAULIFLOWER.

Our Cauliflower seed is imported from Denmark. Danish grown seed is the finest and best in the world.

Dry Weather.

Especially Adapted to Resist Drought. Reaches Perfection When Ordinary Sorts Fail.

Pre-eminently the best early variety for the family garden and also for market gardeners in sections which are not especially adapted for Cauliflower.

Plants are of vigorous growth, producing large solid heads of snowy whiteness and fine quality. It has heavy foliage and is not liable to blight in hot weather.

peculiarly adapted to dry situations and to resisting the effects of droughts.

Early Snowball. For earliness, and reliability to produce a head of good size, and rich, white, curdy appearance it is unequalled.

It forms snow white heads, six to ten inches in diameter, of good quality. While originally recommended and used as an early variety, it has not only supplanted all other sorts for spring planting, but it has largely driven out the large late sorts for fall use, being much finer in quality, and the one Cauliflower that is absolutely certain to head when conditions are ordinarily favorable.

The heads are so solid, compact, and deep that they will outweigh those of any other strain. There is a great difference in the strains of this variety offered, but our stock is the very best.

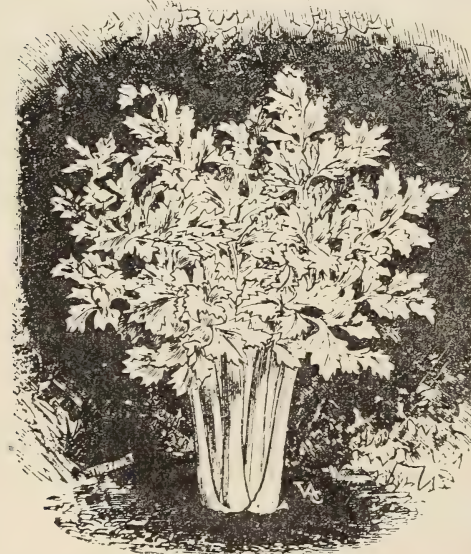

Pkt. 15 cts.; $\frac{1}{4}$ oz. 60 cts.; $\frac{1}{2}$ oz. \$1.10; oz. \$2.00.

DRY WEATHER

It is in all respects a first-class cauliflower, but is especially and particularly adapted to dry situations and to resisting the effects of droughts.

It will also do well in moist soil. Pkt. 15 cts.; $\frac{1}{4}$ oz. 70 cts.; $\frac{1}{2}$ oz. \$1.25.

WHITE PLUME

EARLY SNOWBALL

CELERY.

White Plume.

This is the earliest and most easily blanched Celery. The plants grow rapidly and blanch easily during the summer months.

Later in the fall the central stalks and leaves are of pure snowy whiteness even without earthing up, but stalks should be gathered together and earthed up as in other varieties, so as to produce close attractive bunches. As to succulence, crispness and quality, the White Plume is all that can be desired of a white celery.

Pkt. 5 cts.; oz. 30 c.

Giant Pascal.

One of the most popular sorts for winter use. It grows about two feet high; the stalks are thick; solid and stringless, and almost as brittle as glass. The stalks are of strong growth, wide and thick, quite heavily ribbed, very brittle and crisp when nicely blanched, making large bunches.

It blanches easily and keeps well. Pkt. 5 cts.; oz. 20 cts.

CELERY.

Golden Self-Blanching.

The best of all self-blanching varieties. It is without doubt the most popular celery grown. The ribs are perfectly solid, crisp, brittle, and of a delicious flavor surpassed by no other variety, while it has the decided merit of being self-blanching to a remarkable degree. This variety is being extensively grown both for market and private use, not only on account of its ease of culture, but for its superior quality.

The hearts are large and solid, blanching to a beautiful golden yellow. When grown in moist soil the stalks are numerous and large in size. Extra selected French grown seed. Pkt. 10 cts.; oz. 45 cts.

GOLDEN SELF-BLANCHING

Winter Queen.

This Celery is very stout, thick and heavy, with a much larger heart than any other variety. It is a close, compact, grower, blanches to a beautiful creamy white and is showy and attractive in appearance when ready for table use. The stalks are solid, crisp and of a rich nutty flavor. It has a larger heart than any other celery, a habit of growth which gives it truly remarkable value. It bunches up handsomely, and presents an attractive appearance on the market. Pkt. 5 cts.; oz. 20 cts.

The most popular of all Celeries for winter.

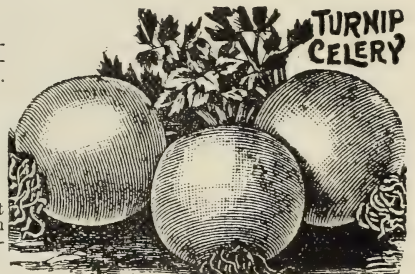

WINTER QUEEN

Celeriac, or Turnip Rooted Celery.

This is an excellent vegetable. It produces large turnip-shaped roots which keep well for winter use. It is highly esteemed either cooked in the same manner as other vegetables, for flavoring soups, or sliced and used as a salad.

Pkt. 5 cts. oz. 15 cts.

TURNIP CELERY

CRESS. Fine Curled.

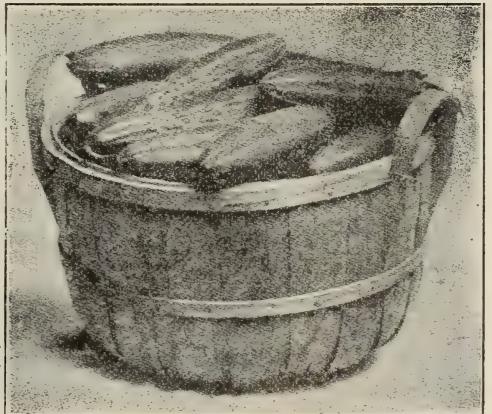

An annual making a good salad. Leaves are finely cut and feathery, like a good parsley. It is dwarf and compact in growth. Very ornamental; of quick growth; crisp and refreshing. Pkt. 5 cts.; oz. 10 cts.

Select Cucumbers.

Our Cucumbers were grown from finest select stock, carefully rogued and are true of type. The most of our seed was grown on the Fairfield Seed Farm, which for quality and productiveness is unexcelled.

Davis Perfect.

Cucumber which for shape, quality, color, and forcing indoors, or growing outside, is unexcelled. The type is perfectly fixed. It has an ideal shape, being slim and symmetrical. The eating qualities surpass all other varieties. The vines are strong, rampant growers and enormously productive, outyielding any variety at present on the market. It does not change its dark rich color when grown outdoors, in fact it resembles the hothouse product so closely that dealers cannot detect the difference. The seeds that are contained in it when it is in slicing condition are so small and tender that they are unnoticed. It is the most nearly perfect CUCUMBER yet introduced. Pkt. 10 cts.; oz. 15 cts.; ¼ lb. 35 cts.

Extra Early White Spine.

A dark green, handsome cucumber, often attaining a length of twelve inches; straight and attractive in shape. It makes a hard brittle pickle when small, and a grand table variety when large. It makes a valuable variety to plant for early market. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.

JUNG'S FAIRFIELD GIANT

Jung's Fairfield Giant. This is without any exceptions the darkest green and most unusually vigorous in growth and produce an enormous crop of the handsomest of all Cucumbers. The vines are nearly seedless Cucumber in cultivation.

The fruits are smooth, of a very deep green color and grow from fifteen to twenty six inches in length, being one of the largest cucumbers grown. When the fruits are from eight to ten inches in length, or just the right size for slicing, they are practically solid, there being hardly a trace of seed to be found. The pure white flesh is very firm, sweet, crisp, and the finest flavored of all cucumbers. As shown in the illustration the fruits are very long and slim which together with their deep green color will make them bring the top prices in all markets. It is sure to become popular with all gardeners. Fairfield Grown Seed. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 75 cts.; postpaid.

FORDHOOK FAMOUS

Fordhook Famous.

The longest White Spine, finest flavored of all Cucumbers. This is the handsomest of all long green

cucumbers; always straight and well formed, they never turn yellow. Critical buyers are willing to pay an extra price on market for these unequaled fruits. The vines are of strong vigorous growth, with heavy foliage, and set the extra large fruits freely throughout the season. The cucumbers are smooth and regular in form averaging twelve to fourteen inches in length, and have a very thin and tender skin. The flesh is very thick, crisp and exceptionally mild in flavor. The cucumbers are about all flesh as the seed spaces are very small. Pkt. 5 cts.; oz. 15 cts. $\frac{1}{4}$ lb. 30 cts.

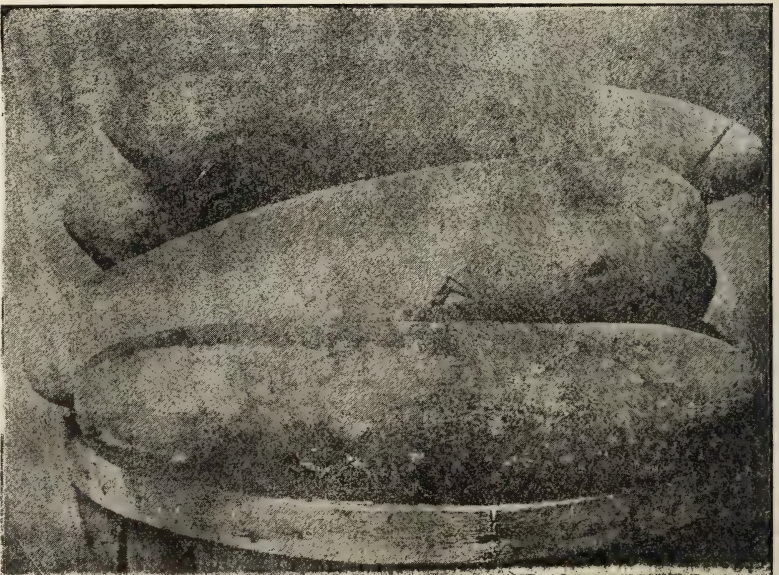

Cumberland.

The vines are hardy, of strong, vigorous growth, and very productive. The young cucumbers are thickly set with small spines, and are equally attractive for making small gherkins, medium-sized or large pickles.

The straight young fruits possess the distinct roughened surface so much desired for small pickles. When matured the fruits average nine to ten inches in length, two and one-half inches in diameter, have well-rounded ends, and are of excellent quality for slicing.

We can honestly recommend this as one of the best pickling cucumbers.

Pkt 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

Plant
JUNG
Quality
Seed and be
Prosperous,

Emerald Cucumber.

A symmetrical dark green cucumber which holds its color a long time after being picked. It is strictly an evergreen, retaining its color until quite ripe, making it an attractive variety.

The fruit sets early, and its vigorous vines abound in long, straight handsome fruits of the most desirable qualities. As a slicer the flesh is perfectly crisp and tender, and the flavor most pleasing.

The young fruit being dark green, straight, slender and almost spineless, makes an excellent pickle, and when ripe none excel it for making sweet pickles. Good for forcing under glass, or for long distance shipping. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 30 cts.

Sweet Corn.

We offer FAIRFIELD Grown Stock which for quality and earliness is unsurpassed.

Early Fordhook.

This is the earliest Sweet Corn in cultivation. The ears are large, averaging from six to eight inches in length. It is a few days earlier than Cory, and has both grains and cob of a pure white color. Ears are eight-rowed, with quite small cobs and deep grains.

The seed is of exceptional hardness, admitting to earlier planting than the later and more tender varieties. The stalks are of sturdy vigorous growth, three to four feet high, with abundant foliage and generally produces two fine ears to a stalk. Pkt. 10 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

Golden Bantam.

This is without any exceptions the sweetest and most tender Sweet Corn on the market. It is not only very early, but also extra hardy. Although the grain in its young and tender state is rich and sweet beyond comparison, the dry seed is quite solid permitting of the earliest planting. The stalks grow from three to four feet high and produce one to two good ears on each stalk. The ears are from five to seven inches in length; but what it lacks in size is fully made up in quality and productiveness. The color of the grains is a bright golden yellow. In flavor it is exceptionally rich and sugary.

Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

Premo.

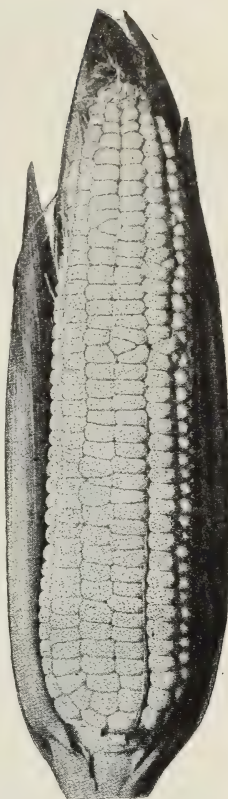

It combines all the merits of the leading early varieties, but is superior to them all in size, quality and yield. Premo is very hardy and may be planted sooner than other varieties. The stalks grow about five feet high and are very vigorous, generally bearing two well-developed ears to a stalk. Its earliness and table quality is sure to bring it into favor with all gardeners. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

THE LEADING LATE VARIETY OF SWEET CORN.

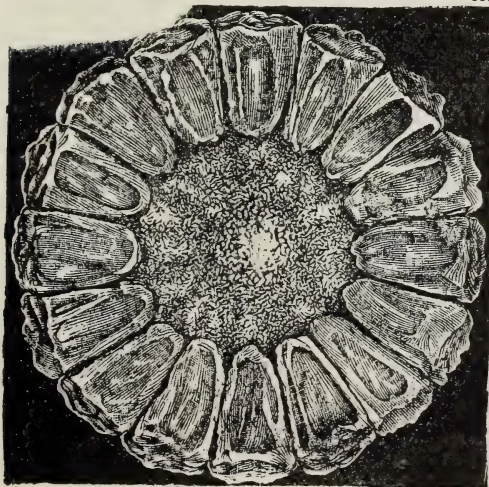

White Evergreen.

The most valuable main crop Sweet Corn ever introduced. White Evergreen is much superior to Stowell's. It retains all the most desirable features, with the added merits of pure whiteness in color, a more tender grain and distinctly sweeter flavor. The ears average very large and are well filled to the tips with the long sweet grains, of pure whiteness and most delicious flavor. The stalks are strong growers, from six to seven feet high, and sometimes bear three fine ears to a stalk. The ears contain sixteen or more rows of deep grains, which are protected by a thick heavy husk.

Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

PREMO

WHITE EVERGREEN

The **LARGEST-EARED, SWEETEST-
FLAVORED EARLY VARIETY**
IN CULTIVATION.
SWEET CORN.

Howling Mob. This variety is of exceptional hardiness and productiveness. It produces an ear of large size, combined with an unusual sweet flavor for so early a corn. The stalks are strong and vigorous, four to four and one-half feet high and generally produce two fine ears to each stalk. The ears are seven to nine inches in length, with fourteen or more rows of medium-sized pearly-white grains. The ears are protected by a heavy husk which extends beyond the tip of the ear and forms a safeguard against the destructive green worms. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

EGG PLANT.

Black Beauty. The earliest and best of all large-fruited Egg Plants. It is an extra early variety with fruits of a beautiful jet black color. The fruits set freely and develop quickly so that the entire crop can be gathered before there is any danger of frost. It is of dwarf growth and bears its fruit, which weighs from one to three pounds, close to the stem. The calyx is entirely free from spines and thorns. The intensely brilliant coloring is uniform over the whole fruit. Pkt. 10 cts.; oz. 40 cts.

HORSE RADISH.

Maliner Kren.

A new, very quick-growing, large-rooted variety. Cuttings set out in April will yield large bottoms in October. Its flavor is the best, this is very noticeable in the fall when the old variety would be too old and juicy for use. Roots are as white as chalk. It is as easily grown as potatoes and should be grown in every garden. Per dozen 20 cts., postpaid.

Leek.

Long Mezieres.

Highly esteemed for flavoring soups, stews, etc. The plants are of strong, vigorous growth, and have extra long stems, which blanch to a snowy whiteness and are of a delicious flavor. Pkt. 5 cts.; oz. 15 cts.

Lettuce.

You should grow Lettuce largely for your table!

Nothing is more wholesome, and if you once acquire the habit you will wonder how you ever enjoyed a dinner without a salad.

Jung's All Cream.

This remarkable Lettuce does not head, but makes a loose bunch of leaves of superlative fine quality.

The leaves grow upright, the upper part of the outer leaves turning outward very gracefully, and are handsomely wrinkled. The inside leaves are almost white and wonderfully crisp and tender. It grows very quickly, is ready to use early, and remains for weeks. It is the cream of all sorts and should be in every garden. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

Rhubarb, or Pie Plant.

Victoria.

A splendid variety, stalks very large and tender. For best results roots should be planted three feet apart each way. Ready about April 1. Price, 20 cts., each; 3 for 50 cts., by mail postpaid.

Kohl Rabi.

THE EARLIEST

Purple Vienna.

This vegetable is grown for its turnip-shaped bulb, which is formed above the ground.

Excellent for soups or cooked in the same manner as turnips. The bulbs should be used while young and tender. The best for table use. Pkt. 5 cts.; oz. 15 cts.

White Vienna.

Grows to large size and of juicy quality. Very early, of fine shape and delicate flavor. Pkt. 5 cts.; oz. 15 cts.

Earliest Wayahead Lettuce.

WAYAHEAD

This is the finest Lettuce ever offered to the American public. It is the quickest growing and most attractive

extreme-early Lettuce producing handsome, solid heads fully one week earlier than Black Seeded Tennis Ball. Its earliness makes it the ideal variety for market gardeners, as the early heads always bring the best price. Its quality is unsurpassed; the heads are very solid; specimen heads have weighed six ounces when trimmed. The interior of the heads is blanched to a beautiful creamy color, while the leaves are tender, juicy and sweet-flavored. The quality of this remarkable variety is unequal among the earliest varieties. We offer Fairfield grown stock which is the finest and best grown. Pkt. 10 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 70 cts.

All Heart.

An exceptional hardy variety producing medium sized heads quite early.

It is a very desirable variety for hot-bed culture in winter and for withstanding heat in summer. The heads are from five to six inches in diameter, very solid, and the inner leaves blanched to a rich creamy white. When grown, forms large solid heads which are exceedingly crisp and tender and of fine quality. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

Naumberger.

This new variety is sure to become famous for its remarkable certainty to produce a fine solid head of large size. It might aptly be called "SUREHEAD". It is also

extra early, being one of the first to head; the heads will stand longer without rotting or bolting to seed than any other variety. The quality is all that can be desired, being tender, buttery and of very mild flavor. Most highly recommended. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.

Butterhead.

A grand, mammoth, hard-heading Cabbage Lettuce. Plants have extra large solid round heads, sometimes

measuring twelve inches across, that are particularly rich and buttery in flavor; always well blanched and tender. The inner leaves are beautifully white and finely curled. Splendid for summer use, both for the home table and for market. Pkt. 5

cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 35 cts.

A GRAND CABBAGE LETTUCE.

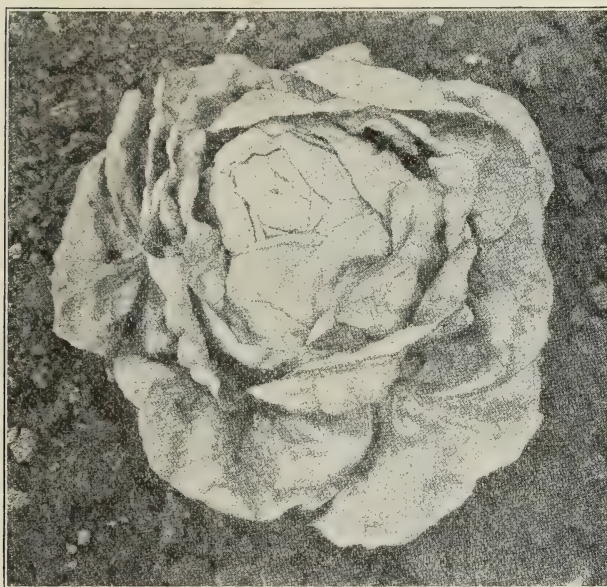

California Cream Butter.

A Grand, Good, Butter Lettuce for summer use.

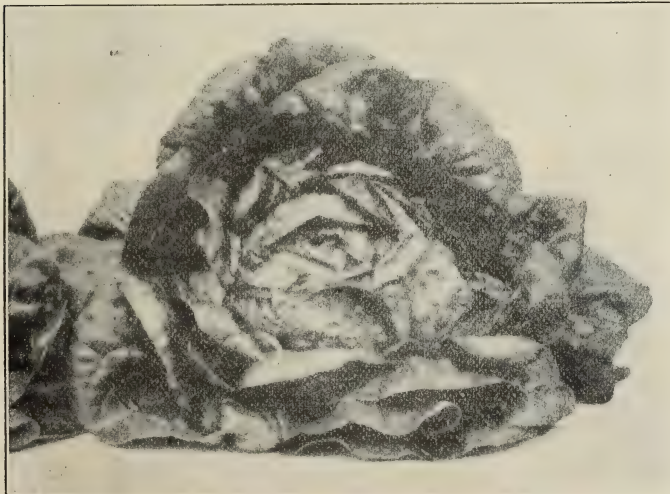

The heads are of good size, round and solid. The outside leaves are medium green, while those within are of a rich cream yellow.

Rich and buttery in taste. It produces large solid heads in hot weather. Easy to grow and a good shipping variety.

This is one of the finest and best sorts ever offered. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

NAUMBERGER

CALIFORNIA CREAM BUTTER

May King Lettuce.

This new variety has proved itself capable of satisfying the most exact requirements that could be made of an early head Lettuce. It is not in the least

affected by cold or wet weather, but produces large solid heads, 10 to 14 days ahead of most other varieties. The plants grow 6 to 7 inches in diameter, with the outer leaves folded closely, forming the plant into a solid head.

The outer leaves are light green, slightly tinged with brown; the inner leaves are light yellow and of a fine, rich, buttery flavor. Each head will weigh nearly a pound when trimmed. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 40 cts.

Grand Rapids.

A well known forcing variety for the middle West where butter head varieties do not grow well under glass. It does not form heads, but makes large bunches of light green leaves with fringed edges. Its delicious quality and handsome appearance makes it the most popular for early spring or fall sowing. Its upright habit of growth permits close planting. It will make a quick growth under adverse conditions and is not subject to rot. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

MAY KING

It does not form heads, but makes large bunches of light green leaves with fringed edges. Its delicious quality and handsome appearance makes it the most popular for early spring or fall sowing. Its upright habit of growth permits close planting. It will make a quick growth under adverse conditions and is not subject to rot. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

NEW FORDHOOK

MUSK MELONS.

New Fordhook.

The finest flavored and sweetest Musk Melon in cultivation.

Fully equal to Emerald Gem in flavor. So firm is the rough-netted skin, and so solid the thick salmon flesh, that the melons carry to market even better than Emerald Gem.

New Fordhook is a cross between Emerald Gem and Jenny Lind. As shown in the illustration it resembles the Jenny Lind in form; it is equally as rough-netted, while the skin is emerald-green.

The flesh is very thick, of an attractive deep-salmon color and surpassingly sweet to the very rind. The beautiful salmon flesh, while so surpassingly luscious, is not only very thick, but also extremely solid. The rind, although thin, is unusually firm, so that the fruits carry well to market. It is most vigorous in growth, very early and extremely prolific. Each vine sets from five to nine melons immediately around the stem; frequently the fruits touch one another.

The melons are remarkably even in size, weighing from one and a half to two pounds each. For handsome appearance, extreme earliness, great productiveness and superb quality it is unexcelled. Be sure to give New Fordhook a trial. Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 60 cts.

Extra Early Hackensack.

This is a selection of the popular Hackensack, but ripens fully ten days earlier. A bountiful yield and one of the most extensively grown of all musk melons. It is a large, round variety, flattened at the ends, well ribbed and deeply netted. The flesh is green, inclining towards yellow at the center, and of the most delicious flavor.

Fruits attain a good size. The vines make good strong growth and bear abundantly. It is also considered a good shipping melon. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

EXTRA EARLY HACKENSACK

A PAGE OF ELEGANT MUSK MELONS.

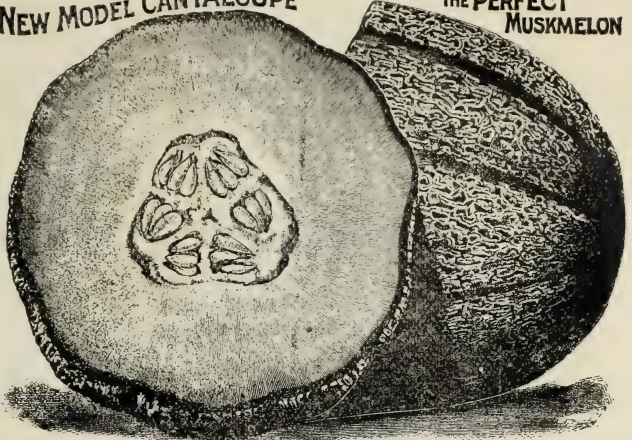

New Model.**NEW MODEL CANTALOUPE****THE PERFECT MUSKMELON**

**SPICY GREEN FLESH.
SMALL SEED CAVITY.
A PRODIGIOUS CROPPER**

The Model is an early cantaloupe, about twice the size of Rocky Ford, and more productive. It is almost round; the flesh is thick and firm, green colored, while in delicacy and flavor it is unexcelled.

The flesh is deep and firm, extending from the rind almost to the center of the melon. The Model bears transportation well, and can be carried to distant cities without injury.

It is larger than Rocky Ford, the average weight per melon being over two pounds. No one who wants good melons for home or market use should fail to plant this variety. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 50 cts.

**Burrell's Gem.**

A very popular salmon fleshed melon in all leading restaurants. The melons are six to seven inches long by four and a half to five inches in diameter, rather sharply sloping at the ends. They are quite well ribbed and covered with a fine grayish netting. The skin is a rich dark green, contrasting finely with the deep orange-salmon colored flesh, which is very sweet and tender. The flesh is thick and firm, ripening close to the skin, leaving only a thin rind. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 35 cts.

**Paul Rose.**

This variety combines all the good qualities of Netted Gem and Osage, the varieties from which it originated, possessing the sweetness of the latter with the finely netted appearance of the Gem.

The fruits are nearly round or slightly oval, rather than Netted Gem, ribbed and heavily netted; of a light green or faint golden hue when fully ripe. The flesh is thick, of a rich orange color, and ripens close to the rind. Its firm flesh makes it an ideal shipper of handsome appearance and fine quality. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

**Netted Gem, or
"Rocky Ford".**

The most popular green fleshed musk melon. In the hands of Rocky Ford growers it has made Colorado famous in Eastern markets for melons of UNEQUALLED quality.

The vines are exceedingly healthy and vigorous, bearing an enormous quantity of fruits during the entire season. The color of the skin is of a rich greenish gold; the netting is prominent and light in color; appearance very attractive. The flesh is very deep, ripening clear to the rind, very solid, yet thoroughly melting, and it has an exceedingly small seed cavity.

It is very sweet and luscious in flavor. It is safe to say that no melon has ever come into the large markets which has sold so readily and at such high prices as the Rocky Ford, often to the exclusion of other varieties. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

**ROCKY FORD**

It is very sweet

Water Melons.

Fordhook Early.

This is the only extra early water melon we have that is of good size and quality. From seed planted May 10 **LARGE RIPE MELONS WERE PICKED THE LAST DAYS OF JULY.** The fruits are of good size, rather short and blocky in form, with large diameters.

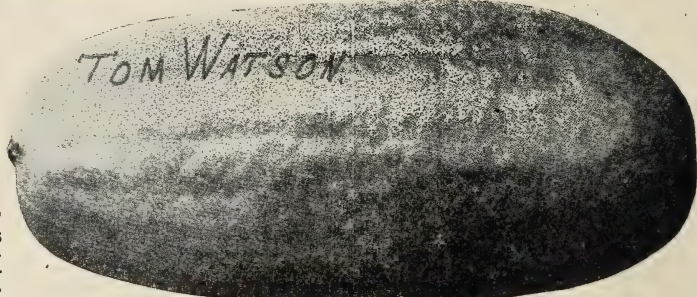

The vines are of strong vigorous growth set-large melons in good numbers. Skin dark green, occasionally with faint stripes of a light green.

Flesh bright red, crisp, sweet and of splendid quality. A good keeper, an excellent shipper, and a good selling melon, being attractive and of good quality. The quality continues to improve after ripening. The heart is large, there is little or no seed cavity, and very few seeds—all solid flesh, the quality of which is sustained clear to the rind. It can be grown successfully over a larger latitude than any other Water Melon, and it will mature large crops in the most Northern States.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

Tom Watson.

**BEST QUALITY.
BEST SHAPE.
BEST SHIPPER.
BEST SIZE.
BEST APPEARANCE.**

The **TOM WATSON** IS an extra large melon of attractive appearance, uniform in shape and quality.

The luscious crimson flesh is "as sweet as honey", melting, and of superb flavor. The average melon will weigh thirty five to forty pounds and measure about twenty eight inches long and about twelve inches in diameter. It is very prolific, producing in greatest abundance the large delicious fruits. The dark green rind is tough but thin and easily withstands shipment to far distant markets. The heart is large with no sign of core. Seeds are brown tipped with white. We have great faith in the **TOM WATSON** and believe it is one of the very best Water Melons ever offered.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

Sweet Heart.

A large water melon nearly globular in shape, but a little longer than thick.

Fruits are large and heavy, skin very pale green, with distinct netted lines of a slightly richer shade. The solid flesh is a deep rich red, crisp and melting; its excellent quality has made it a leading favorite on the market. The vines are vigorous and productive, ripening the fruit early. A good keeper, and a good selling melon, being attractive and of good quality. The handsome fruits bear shipping well.

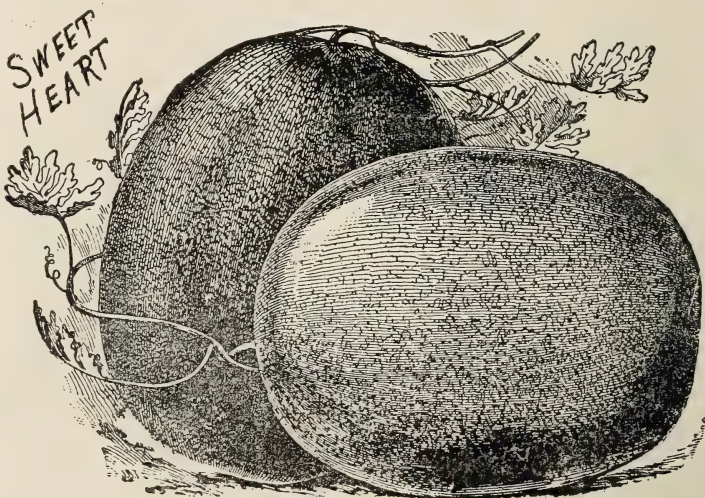

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

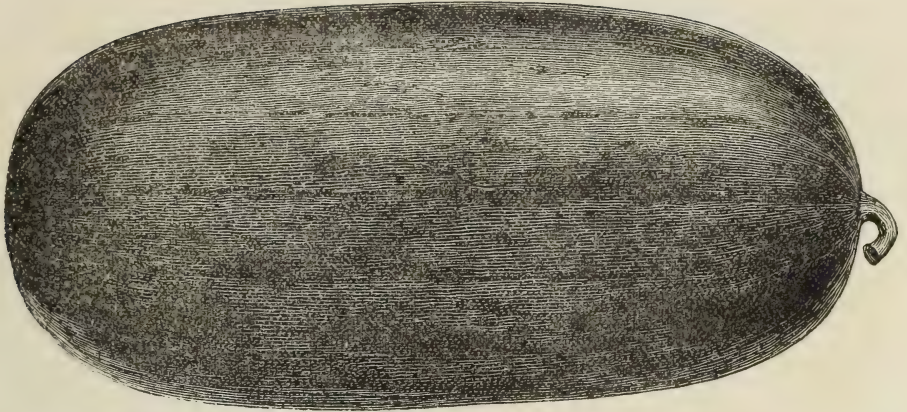

Dark Icing.

A nearly round white seeded water melon, with very thin rind. The flesh is deep pink and of delicious sweetness. Fruits large, very dark skinned and of attractive appearance.

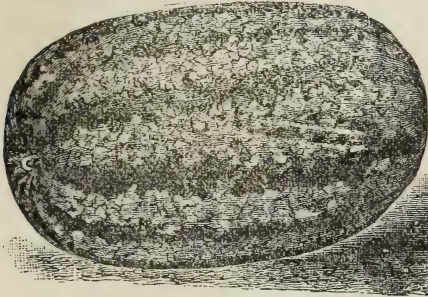

The vine is a remarkably strong grower and a heavy bearer. It is an excellent shipper notwithstanding its thin rind.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.

Halbert Honey. The very finest melon in cultivation for home use or nearby market. A melon that has no equal in beauty, quality, and productiveness. The melons are smooth and regular in outline, fourteen to eighteen inches long, and six to eight inches in diameter. Color of the rind is a clear, glossy deep green. The flesh is a beautiful crimson, extending to within less than half an inch of the rind, which like the rind is so tender that it will not stand shipping a long distance unless carefully handled. The first melons ripen early and the vines continue to develop fine fruits throughout the season; even the late fruits are of the same large size and regular form. **The sweet flesh melts away in the mouth "like honey."** Pkt. 5c.; oz. 10 c.; $\frac{1}{4}$ lb. 25 c.

Dixie.

A water melon of highest quality and value. The size is large, specimens of fifty pounds being not infrequent. The flesh is scarlet, very fine and extra firm. A noteworthy and very valuable feature of this melon is the fact that the rind, though thin is almost impenetrable, giving it remarkable keeping quality.

This variety is the most prolific known, often producing six to eight melons on a single vine. The vines root at the joints, and thus become more drought resisting and vigorous.

This is a famous Southern melon and is grown largely for the markets. Pkt. 5cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20cts.

Mustard.

Gigantic Thick Leaved.

This new variety has proved itself superior to anything yet offered. Each plant produces a great number of large thick leaves which are of the finest flavor.

Grown in rich soil, the leaves attain a length of two feet. A single plant will produce sufficient leaves for a large mess of greens. Excellent for boiling.

Pkt. 5 cts.; oz. 10 cts.

Onions.

We make a specialty of "High Grade" Onion seed. It is better to plant no Onions at all than to sow seed of poor quality.

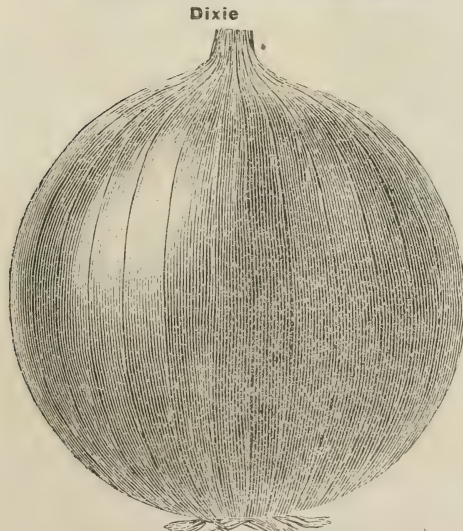

Our seed is grown from the finest selected bulbs and is of strong vitality.

Large Red Wethersfield.

The most popular red variety. It is very productive having yielded over 1,000 bushels per acre. It is not an early ripening sort, but continues in growth throughout the season and consequently makes very large onions. The bulbs are large though somewhat flattened, as shown in the illustration. The outer skin is a deep purplish red; flesh white slightly tinged with rose.

It is a fine keeper; suitable for late winter markets. The best variety for poor or dry soils. You will make no mistake by giving this onion a trial.

Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.60.

Jung's Yellow Globe Danvers. See page 20

Onions, continued.

20

Three True Globe Onions.

The Southport Onions have increased wonderfully in public favor during the last few years, and they well deserve their popularity. In almost all markets they will invariably bring top prices. They are not only of handsome appearance, remarkable solidity, and good keepers, but also fully equal in yield to the best strains of any varieties.

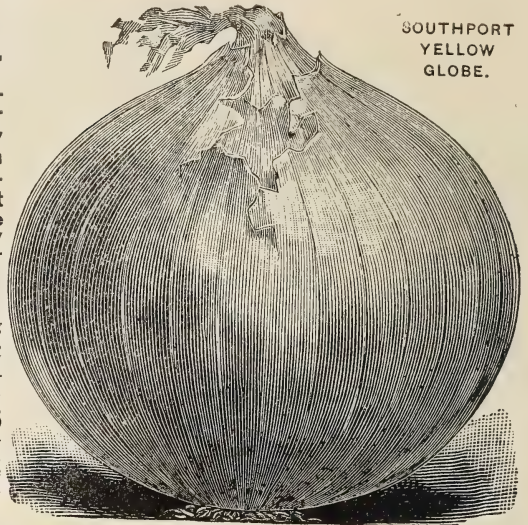

Southport Red Globe.

A handsome Onion of immense size, averaging nine to ten inches in circumference, solid, heavy, and of perfect globe shape; the skin is of a glossy deep purplish-red color. The flesh is close-grained, sparkling white, cooking tender and mild.

It is hardy, a splendid keeper, and a big yielder, averaging under good culture from 800 to 1,000 bushels per acre.

Our strain of this seed is unsurpassed, the bulbs being selected for largest size, solidity, brilliant rich color, and typical globe shape, with small necks, thus insuring thorough and regular ripening and curing. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.60.

SOUTHPORT
YELLOW
GLOBE.

Southport Yellow Globe.

This is one of the most satisfactory and popular varieties raised, either for family use or for market. It is an enormous yielder, hardy and reliable, making, under good conditions, often up to 1,000 bushels per acre.

The onions are models of perfection, growing uniformly deep and globular in shape, veritable globes of gold, and are extra large, averaging nine to ten inches in circumference. The color of the skin is an attractive golden-yellow; the flesh snow-white, firm, mild and juicy.

The small necks enable the onions to ripen down evenly, insuring good keeping qualities. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.60.

Southport White Globe.

The most beautiful Onion grown, being of symmetrical globe shape with a smooth satin-like skin, forming a perfect silver ball. It grows to a large size, averaging seven to nine inches in circumference and is solid and heavy; the flesh is purest white, close and fine grained, mild and of delicate flavor. It is a heavy cropper, yielding under good culture up to 900 bushels per acre.

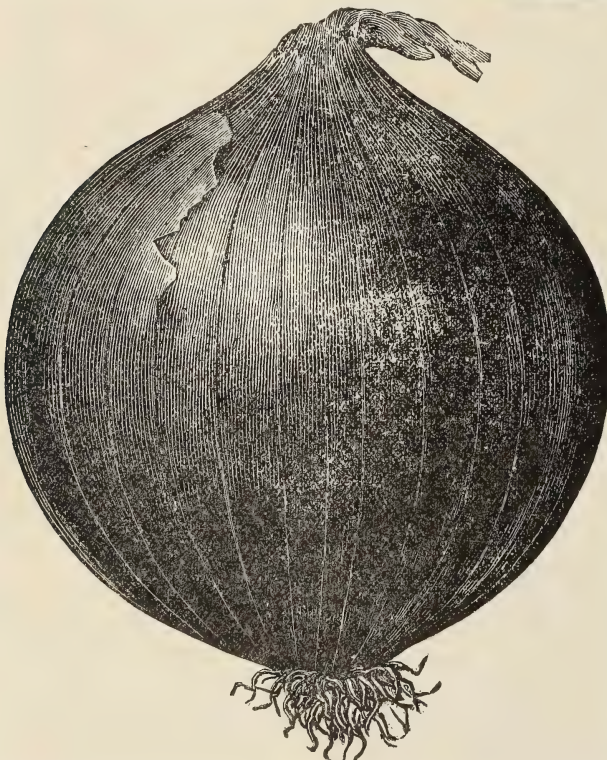

Owing to its large size it is later in ripening than the White Portugal or Silverskin. As soon as ripe the bulbs should be stored in a cool dark shed or dry cellar. Our

strain is grown from picked thin-necked bulbs, which ripen so uniformly that the Onions keep nearly as well as the Red and Yellow varieties. For the family garden as well as for market, this is a valuable Onion.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 50 cts.; lb. \$2.00.

Yellow Globe Danvers. This is a standard yellow onion and is more largely grown than one-half inches in diameter, are nearly globe shaped, and of a light golden brown color. The bulbs grow to about two and white. The bulb is extremely hard and solid, and its earliness, sure cropping character, handsome appearance and excellent quality, have placed Yellow Globe Danvers among the leading varieties for the home and market garden. Our strain of this variety is **UNSURPASSED.** See cut on page 19.

Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.40.

SOUTHPORT RED GLOBE

strain of this seed is grown from picked thin-necked bulbs, which ripen so uniformly that the Onions keep nearly as well as the Red and Yellow varieties. For the family garden as well as for market, this is a valuable Onion.

Australian Brown.

This remarkable onion is of medium size, wonderfully hard and solid and most attractive for market, both in form and appearance. They are extremely early in ripening and make no stiffnecks or scallions. Every seed seems to produce a good sized onion, and the bulb begins to form very quickly when the plant is not over three inches high. It has the reputation of keeping indefinitely, and we think from its firmness and hardness that it will keep in good condition longer than any other onion known. The color of the skin is a clear amber-brown. Bulbs of this variety have been kept in fine condition for a year after being harvested.

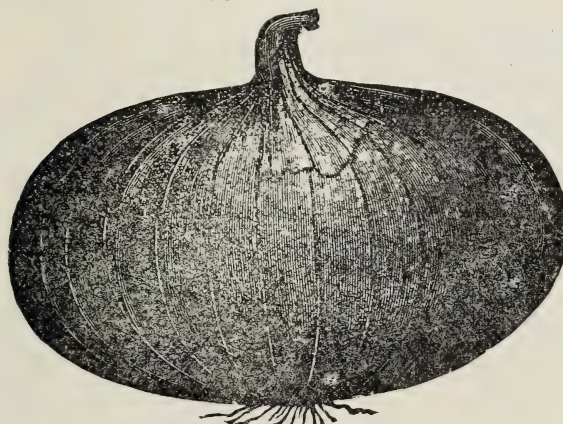

Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.40.

Silverskin.

The leading White Flat Onion For the family garden it is one of the best. The bulbs attain a good size, ripening evenly; the color is a beautiful silvery-white when cured. Its shape is flat but symmetrical.

For a white variety it is not only early but also a good keeper. For slicing and boiling it is one of the best, the flesh being mild and tender. It is largely grown for pickling, being sown three or four times as thick as usual and is also extensively sown for sets.

Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 60 cts.; lb. \$2.00.

Large Red Wethersfield. See Page 19

Onion Sets.

The planting of Onion Sets is increasing rapidly year after year. By planting sets you can have onions ready for use several weeks earlier than can be had by sowing seed.

White Bottom Sets.

These are small, solid and of a beautiful silvery white color. A favorite sort in private and market gardens. Pint, 20 cts.; quart, 30 cts., postpaid.

Yellow Bottom Sets.

Produced from seed which makes the finest yellow sets. Fine and dry, medium in size and unsprouted. Pint, 20 cts.; qt. 30 cts. postpaid.

Red Bottom Sets.

These are planted to produce both early green and large eating onions. Pt. 20 cts., qt. 30 cts., postpaid.

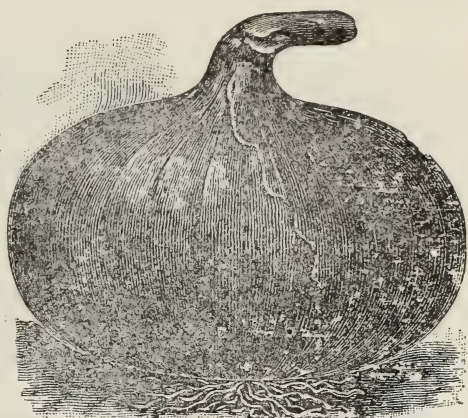

Write for special prices on larger quantities.

Parsley.

Moss Curled.

The leaves are of an extra dark green color. It is very productive, and on account of the densely curled character of its leaves a large quantity can be gathered in a short time. It is much used for flavoring and garnishing. Pkt. 5 cts.; oz. 10 cts.

AUSTRALIAN BROWN
THE KING OF ALL
YELLOW GLOBE ONIONS

Prizetaker.

This is one of the largest onions in cultivation. It is the large, beautiful Spanish variety so often seen in the fruit stores and markets of all large cities. Bulbs

are nearly globe-shaped, with bright straw colored skin, growing to an immense size the first season from seed. They ripen up without stiff necks and present a very handsome appearance. The flesh is pure white, fine grained, delicious and mild in flavor; fine for fall and early winter use. Bulbs measure from twelve to eighteen inches in circumference and under special cultivation specimens have been raised weighing five pounds each. In the markets they attract much attention and sell readily at good prices.

Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.50.

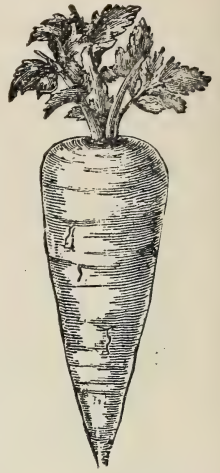

Tell your neighbors about our Seeds.

Okra. White Velvet.

The long, tender pods of okra are very delicious when sliced and cooked in soups.

While this is its chief use, it is also boiled and served like other vegetables. The pods should be gathered while young, as they are then very tender. The plants are of tall growth, with long pods, which are round, smooth, and of a velvety white coloring.

Pkt. 5 cts.; oz. 10 cts.

Parsnips.

Jung's Private Stock.

This is a highly improved type of the Improved Half-Long, producing uniformly large and handsome roots of stocky form, heavy at the shoulder, well rounded, gradually tapering to the base, so that they are easily dug, and if grown in properly pulverized soil the roots will be smooth and free from wrinkles and side roots.

The flesh is white, of fine texture, free from core and stringiness, and especially fine flavored, cooking tender, sweet and rich, rendering it one of the finest of table vegetables for winter use. The roots may remain in the ground all winter, being hardy, or some may be dug late in the fall and stored in sand or soil, so that they can be gotten at easily when the ground is frozen.

Frost improves their quality. It is a heavy cropper. The shape is well shown in the illustration. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{2}$ lb. 25 cts. lb. 90 cts.

Improved Half-Long.

An improvement on the old Hollow Crown, forming roots shorter and thicker than that variety, and more easily gathered. The flesh is white, of fine texture, free from core and stringiness, and of the finest flavor when cooked. This parsnip

is one of the heaviest croppers and we recommend it both for garden and field culture. Its quality is improved by freezing. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{2}$ lb. 20 cts.; lb. 65 cts.

Choice Garden Peas.

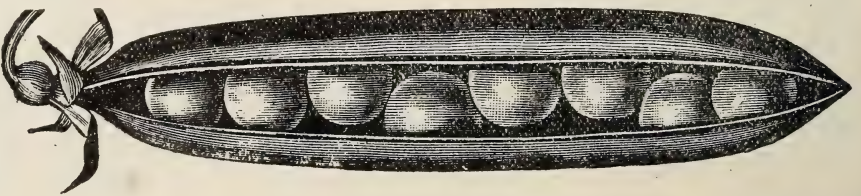

Our Peas are Northern Grown and free from bugs. They are the earliest, hardiest and most productive. They were grown from the finest selected stock, are bright, handsome, of perfect growth, were critically rogued and carefully hand-picked. The Pea crop never was as small as this year so we will advise our friends and customers to send their orders early so they may be filled before our stocks are exhausted.

Extra Early Tall Peas.

Jung's Best Extra Early. The best strain of Extreme Early and remarkable Extra Early Peas yet developed. The vines are quite slender, of very quick growth, and average eighteen to twenty five inches in height. The pods are well filled and the entire crop can generally be gathered at one picking. Every seedsman claims to sell an "earliest" Pea, but after testing them all, we know that not one excels our own strain. It is equally as early as the choicest stock of Alaska, and is much sweeter in flavor. Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 35 cts.; qt. 55 cts.; pk. \$2.10.

Best Ex. Early

Grades. See page 23

Gradus or Prosperity.

A pea almost as early as Alaska. Equal in size of pods and quality to Telephone.

The vines have heavy stems, with large light-green leaves, and grow from three to five feet high.

It produces uniform large pods, some having measured five inches in length.

The pods are well filled with peas of enormous size which are rich and buttery in taste.

Ripening very quickly, the pods must be picked as soon as fit for the table. Habit vigorous, very quick to germinate and push to maturity.

Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 35 cts.; qt. 55 cts.

See cut on page 22.

Extra Early Dwarf Varieties.

Harbinger.

A dwarf Pea of English origin which rarely grows over eight inches high.

It is quite distinct from all other varieties in habit of growth and appearance, the vines being unusually robust and stocky.

The vines are literally covered with pods which are well filled with peas of most delicious quality.

The even, regular habit of the plants is of great advantage, particularly to market growers.

Pkt. 5 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 35 cts.; qt. 55 cts.

HARBINGER

EARLY EXCELSIOR

Early Excelsior.

The leader of the early dwarf wrinkled Peas.

It grows to a height of about twelve inches; of compact growth being similar to American Wonder and Nott's Excelsior in this respect but superior to them in the following particulars; first, vines are more dense and sturdy; second, the pods and peas are decidedly larger, measuring from three and one-half to four inches in length; and contain from six to eight peas of delicious quality; third, it is a much surer cropper.

It is also very early, the past season it was ready for use 45 days after sowing. Pkt. 5 cts.; $\frac{1}{2}$ pt. 20 c.; pt. 35 c.; qt. 55c.

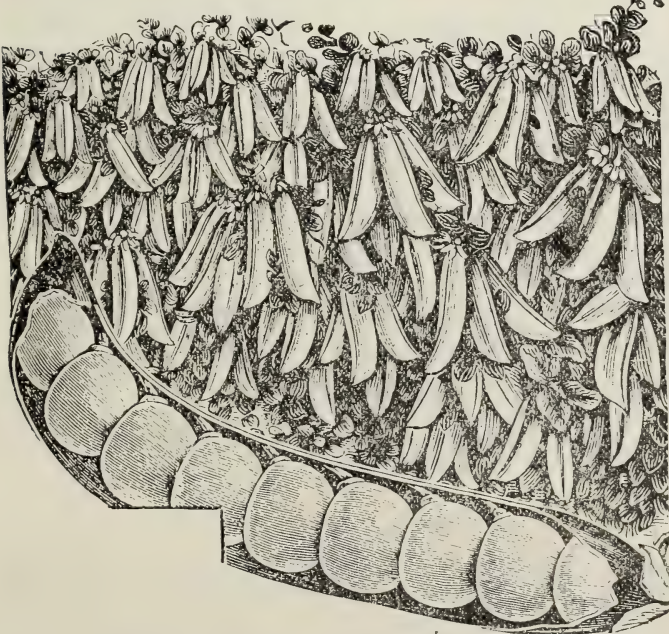

Nott's Excelsior.

The sweetest and most prolific of all Early Dwarf Peas.

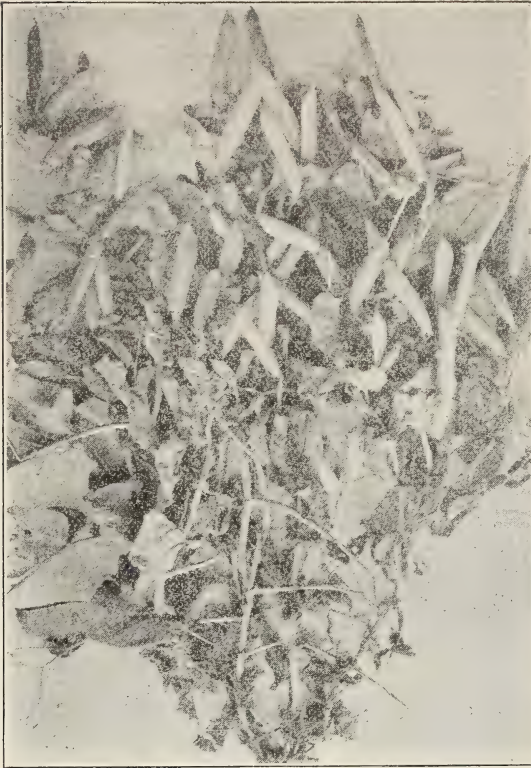

A very fine variety of dwarf compact growth, with pods three inches in length, which are well filled to the squared ends with large peas of unusually sweet flavor.

It is of vigorous growth and wonderfully productive. It grows from twelve to fourteen inches high. The best sort for the market or home garden.

Pkt. 5 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 35 cts.; qt. 55 cts.

Improved Senator. An elegant Pea. See page 24

Jung's Dwarf Telephone--from a photograph

British Wonder

flavor. It is a delicious vegetable and should be better known and more generally used. Pkt. 10 cts.; ½ pt. 20 cts.; pt. 35 cts.; qt. 60 cts.

Main Crop Peas.

A SPLENDID NEW PEA Improved Senator.

A splendid second-early variety; very productive of large well filled pods. It is of the same season as McLeans Advancer, but the pods are much larger and the vines much more prolific.

The vines grow about two feet high: are very hardy and carry a large crop. The large handsome pods contain from seven to ten peas which are sweet and tender even when large. This is one of the finest peas ever introduced. Pkt. 10 cts.; ½ pt. 20 cts.; pt. 35 cts.; qt. 60 cts.

A GIANT PODDED PEA Jung's Dwarf Telephone.

This is one of the finest dwarf green wrinkled Marrow Peas in cultivation, and one that ought to be grown in every garden. A strong luxuriant-growing variety, attaining a height of about eighteen inches. The pods, which grow five inches long, are packed with immense wrinkled marrow peas, eight to ten being the average, while twelve to fifteen to a pod are frequently found. The quality is superb, rich, sugary and meltingly tender. As high as eighty large handsome pods have been grown on a single plant. Pkt. 10 cts.; ½ pt. 20 cts.; pt. 35 cts.; qt. 60 cts.

THE SWEETEST FLAVORED PEA IN CULTIVATION British Wonder.

Even sweeter in flavor than either Gradus or Thomas Saxton. The growth is similar to Carter's Daisy, except that the foliage is darker green and pods are not so sharply pointed. It is, however, much more reliable, as it is a SURE CROPPER.

The vines are very stocky, twelve to eighteen inches tall and are well supplied with light green foliage, which indicates great vigor. The pods are produced in the greatest profusion, measuring about four inches in length, and contain from eight to ten large dark green peas each which are of the most luscious flavor. It matures a little earlier than Dwarf Telephone.

Most highly recommended. Pkt. 10 cts.; ½ pt. 20 c.; pt. 35 c.; qt. 60 c.

An Edible Podded Pea Mammoth Melting Sugar.

The vines grow four to five feet high. It is very productive and produces enormous pods which average five to six inches in length and one and a half inches broad; thick and fleshy. When broken and boiled like string-beans and served with butter sauce they have a luscious flavor. Pkt. 10 cts.; ½

**JUNG'S SEEDS GROW AND ARE THE BEST THAT GROW. DONT RISK
YOUR GARDEN BY PLANTING SEED OF DOUBTFUL QUALITY. PLANT
JUNG "QUALITY SEED" AND YOU WILL NOT BE DISAPPOINTED.**

A New Mammoth Podded Pea, Jung's Aristocrat.

This grand new Pea is of the large podded type as the Telephone, but the pods are even larger and the peas are sweeter in flavor. The vines are of a rich green color, very stocky in growth, from sixteen to eighteen inches tall, and do not require brushing. The pods are borne in great profusion and mostly in pairs. In size of pods it is an undisputed leader, single pods often measure six inches and over in length. The immense pods are straight and of a fine appearance, and contain from eight to twelve large wrinkled peas closely packed, tender, sweet and of exquisite flavor. Quality is always to be preferred to quantity but in this new Pea you have both. The peas, too, possess the admirable merit of preserving their tenderness and superb flavor long after they are young, and also retain their attractive dark green color when served at table. On our Fairfield Farm it was the largest podded variety grown.

Pkt. 10 cts.; $\frac{1}{2}$ pt. 25 cts.; pt. 35 cts.; qt. 60 cts.

Peppers.

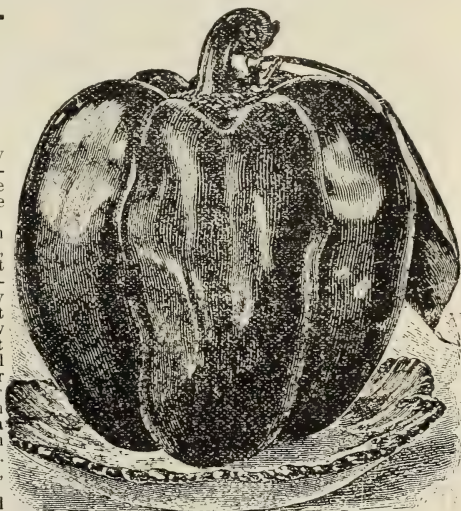

Chinese Giant.

Not only is it immensely productive for so large a pepper, but its enormous size and magnificent appearance make it sell most readily.

The plants are vigorous in growth but of stocky habit, seldom more than two feet in height. It produces monstrous peppers of thick blocky form which are of the most brilliant scarlet. They grow four to five inches broad at the top and are of equal length, divided into four or more ridges; when ripe they are indented at the blossom end.

Frequently half a dozen peppers touch each other, as if on a single bunch. The flesh is extremely mild, — as sweet as an apple.

They can be sliced and eaten like tomatoes. Pkt. 10 cts.; $\frac{1}{2}$ oz. 35 cts.; oz. 60 cts.

Chinese Giant

Early Neopolitan.

The earliest sweet large Red Pepper. Immensely productive and so extreme early, this grand new pepper is of exceptional value to market gardeners.

The plants are of open-branched spreading growth, two and one-half feet in height when full grown, but begin to form fruits when only a few inches in height. The plants continue in growth and fruiting until cut down by heavy frost in the fall, at which time they are still heavily loaded with fruits.

Fruits average four to four and a half inches in length by two to two and a half inches in breadth at the stem end, retaining the thickness for a good portion of the length. After reaching full size the green fruits change to a rich scarlet, and have quite thick flesh of a very mild sweet flavor. Single plants will show from thirty-five to fifty peppers of marketable size at one time. Pkt. 5 cts.; $\frac{1}{2}$ oz. 20 cts.; oz. 35 cts.

Early Neopolitan

Golden Queen.

Golden Queen is the best of all yellow Peppers.

It is always large and sometimes remarkably so, specimens reaching six to ten inches in length and four to five inches in diameter. A single plant sometimes carries twenty large peppers at the same time. The flavor is mild and pleasant and it may be eaten raw. It always commands the highest price on account of its fine appearance and large size. It is unexcelled for stuffing. Pkt. 5 cts.; oz. 30 cts.

Jung's Superb Tomato Seed.

The SMOOTHEST and FINEST FLAVORED EXTRA EARLY TOMATO Fairfield First

The one great fault with other extra early tomatoes is the fact that they do not have sufficient foliage, and as a result the fruits will sunburn which greatly detracts from their appearance and quality.

FAIRFIELD FIRST

is fully as early as any other variety and in addition has a very abundant supply of foliage which protects the fruits from the sun and as a result you will have fruit of very fine appearance and quality.

This variety has been carefully bred for extreme earliness, productiveness and smoothness of fruit. The fruit is

very smooth, of good size and borne in clusters—see illustration. It is a very heavy cropper.

Although it is one of the first to ripen, the vines continue to bear until frost; the size and smoothness of the fruits is maintained until the end of the season.

The color is an intense velvety scarlet, fruits are almost globe-shaped as can be seen from the illustration—making it a splendid variety for slicing.

The fruit is remarkably solid and firm; flesh is thick and heavy, of fine flavor and contains but few seeds. Vines are of strong healthy growth.

If you want the first EXTRA EARLY SMOOTH TOMATOES plant **FAIRFIELD FIRST.**

A cluster of Fairfield First as grown on the Fairfield Seed Farm.

We offer Fairfield grown seed only which was saved from selected fruits.

Pkt. 10 cts.; 1-2 oz. 25 cts.; oz. 40c.; 1-4 lb. \$1.35.

"Fairfield Strain" of Earliana.

A perfect early Tomato, large in size and beautiful in color, nearly seedless and very solid, a vigorous grower and prodigious bearer, yielding its splendid fruit until frost. Its solidity and fine quality are equal to the best medium and late sorts. The plants are compact in growth, with short close-jointed branches, setting fruits very freely in the center of the bushes. It has become very popular with market gardeners who aim to supply the early demand. On account of its firm skin it is an excellent variety for long distance shipping. The fruits mature quickly and ripen up evenly to the stem. The tomatoes are quite uniform in size and of smooth regular form, averaging three inches in diameter and two and a half inches in depth. Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00.

EARLIANA.

Radishes,-continued.

**THE EARLIEST RED RADISH
READY FOR USE IN 18 DAYS**

Earliest Scarlet.

A fine bright red radish of quick growth. It is especially fine for bunching for early market from plantings in the open ground, being ready to market in from eighteen to twenty-five days. It is solid in character, and conspicuously uniform in growth and size. The tops are very small thereby making it the best of all for forcing under glass. The flesh is purest white, firm and crisp in texture and of mild flavor. The roots are entirely free from the hollow center or pithy fibre of overgrown small extra-sorts, even when twice as large. The shape is well shown in the illustration. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 70 cts.

Rosy Gem.

One of the most popular and attractive short varieties ever grown. **READY FOR THE TABLE IN FROM 17 to 20 DAYS AFTER SOWING.** It is a rich deep scarlet at the top, beautifully blended into pure white at the bottom. Exceedingly tender and crisp. Flavor very mild and delicious. A very desirable variety for both the home and market garden. A gem in earliness, beauty and quality. Its smooth skin and fine color gives it an appetizing appearance when served. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 70 cts.

EARLIEST SCARLET

Non Plus Ultra.

An improvement on the old Deep Scarlet Forcing Turnip, which was considered the earliest forcing Radish in cultivation. The roots are small, round and deep rich scarlet in color. They make a very quick growth, and are ready for use in from twenty to twenty-five days after sowing the seed. The flesh is white, crisp and tender, and of remarkable fine quality. It is decidedly the standard red variety for the market or home gardener. The seed we offer is of the very finest strain, our own growing, and is sure to prove satisfactory. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 60 cts.

Hailstone.

The EARLIEST and quickest growing White Radish in cultivation--ready for use in from 15 to 18 days after sowing. The radishes are regular turnip-shaped. They measure one inch in diameter and about half an inch in depth. Flesh is solid, crisp and of mild flavor. The foliage is unusually small. A matured radish will have only a few small leaves not more than two inches in length. Its unusually small foliage, combined with extreme earliness, handsome appearance, solidity, and superb quality, cannot fail to make it the most popular first early white turnip radish. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 70 cts.

HAILSTONE

Success with Vegetables and Flowers

is the title of a little booklet which we have printed for your benefit. It contains full cultural instructions on growing vegetables and flowers and will be sent free with every order asked for.

Radishes,--continued.

Crimson Giant Globe.

This new variety is suitable for forcing or growing outdoors. It is a fine shaped bright-red radish, growing quickly to large size,—see illustration. This radish is a deep globe in shape; two inches in depth; one and one-half inches in diameter, with thin tender skin of a deep crimson. The flesh is purest white, crisp and of mild flavor. The roots are entirely free from the hollow center or pithy fiber of overgrown small extra early sorts,—even when twice as large. It is sure to become a favorite variety.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 90 cts.

Early Long Scarlet Short Top.

This variety is a standard and excellent sort either for private gardens or the market. The roots grow half out of the ground, are very uniform in shape, smooth, and very bright red in color, and continue crisp and tender until fully matured when they are about six inches long. It matures beautiful radishes, which are always brittle and sweet, twenty-five to thirty days from the sowing of the seed. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 60 cts.

New White Icicle Radish.

Long, Slender, Crisp, Tender, Mild, Purest White. Unexcelled as a Money Maker.

An entirely distinct variety from Germany, and derives its name from the almost transparent whiteness of the roots. It produces long, slender, pure white radishes very early in the season much earlier and finer in quality than any other long white variety. The shape is well shown in the illustration. The leaves are short and few, making it an excellent variety for forcing. It is of the best flavor, very brittle and crisp. The roots grow about four inches long and are ready for use in about twenty-five days after sowing. It is a desirable variety for the home garden and market gardeners will find it a money maker. It is destined to become very popular with growers. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 70 cts.

WINTER RADISH.

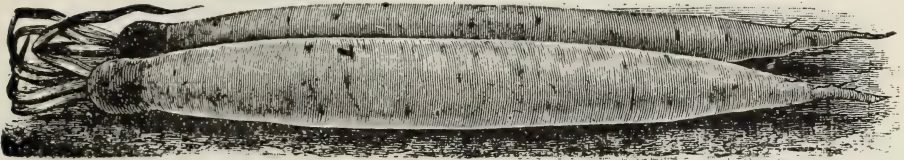

Chinese Rose.

This variety is becoming very popular with market gardeners. It is a large and fine shaped radish, growing partly above the ground. The portion above the ground is darker in color than that below the ground. It is of a half long shape with a blunt point; rose-colored skin; flesh white, solid as an apple. It has not the strong flavor of the Black Spanish and keeps equally as well. Grows about four inches long. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 70 cts.

WHITE ICICLE

HAVE YOUR FRIENDS ORDER WITH YOU. YOU WILL BE DOING THEM A SPECIAL FAVOR BY GETTING THEM THE BEST SEEDS OBTAINABLE AT A REASONABLE PRICE. FOR EACH NEW ORDER SENT US YOU MAY SELECT ANY TEN CENT PACKET IN THIS CATALOGUE.

Jung's Fairfield First Tomato. THE EARLIEST AND FINEST TOMATO GROWN. DON'T FAIL TO TRY THIS WONDERFUL VARIETY.

Salsify.

Mammoth Sandwich Island.

One of the most delicious of winter vegetables, and also one of the most nutritious; the flavor is sweet and highly esteemed whether served boiled with butter or other suitable sauce, or sliced and fried, or used in soup.

This new variety, where known, is entirely superseding the old type, as it produces roots nearly double the size and weight and of equally good quality. Seed sown in spring produces large, fine roots that may remain in the ground all winter or may be dug and stored in sand or earth in November, thus keeping them plump and sweet, to be used as desired during the winter. We have a fine stock of seed which was grown from selected roots. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.25.

Spinach.

Victoria. This is a handsome variety with exceedingly dark green color and has very long standing qualities. The foliage is heavy, the wide dark green leaves being of the true Savoy appearance and of the finest quality. It remains in prime condition two to three weeks after most other varieties have run to seed. Highly praised by market gardeners. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 15 cts.; lb. 40 cts.

Squash.

Bush Fordhook.

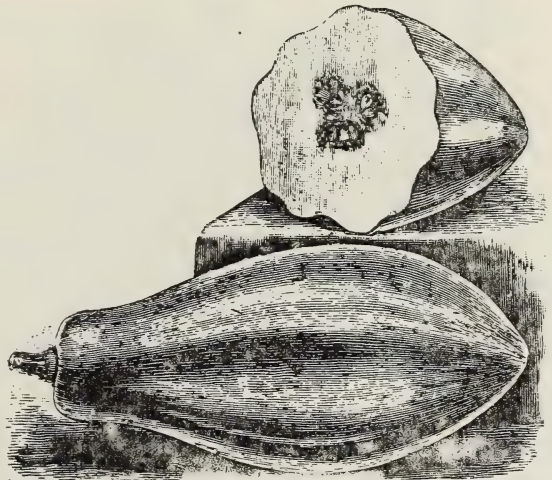

This is the most desirable variety for both summer and winter use. It is of true bush type and can be grown much closer together than the running sorts. The vines are of strong vigorous growth and wonderfully productive.

The fruits are pear-shaped, seven to nine inches long, slightly ridged, smooth thin yellow skin. Flesh is very thick and of a light straw-yellow color.

An important advantage is that any fruits not wanted for summer use can be left on the vines to ripen for winter use. For baking, frying, or pies they are unsurpassed. Stored in a dry place they will keep until the following spring. It is early and has proven to be one of the hardiest and most dependable squash for all localities.

Flesh is of fine quality and flavor.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. \$1.10.

BUSH FORDHOOK

Giant Summer Crookneck.

This magnificent strain is equally as early as the common small fruited varieties. It is of a bright yellow color, and from eighteen inches to two feet long. Fruits are solid, heavy and freely produced on healthy vigorous plants of compact bush habit. The flesh has a greenish yellow color, is dry and of most agreeable flavor. A most profitable variety to grow for market as it grows very quick and is of extra large size. It is very productive and of superior quality. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 90 cts.

IF YOU WANT THE BEST GARDEN IN YOUR NEIGHBORHOOD PLANT JUNG "QUALITY SEEDS". JUNG'S SEEDS NEVER DISAPPOINT.

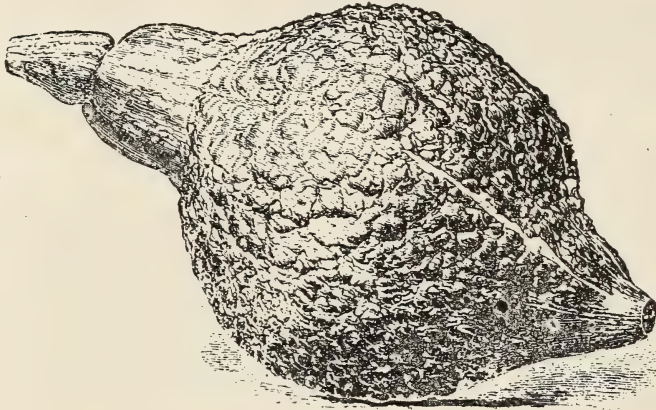

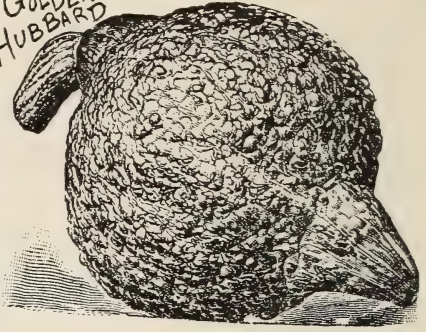

Squash,-continued.

AN ELEGANT WINTER SQUASH Golden Hubbard.

This splendid Squash, of recent introduction, is a sport from the well known old Hubbard, which it closely resembles in every respect except in color, which is a bright golden orange. Flesh deep golden yellow, much richer in color than Hubbard, fine-grained, cooks very dry and is of excellent flavor.

While it retains all the excellent qualities of the old Hubbard, it is much more vigorous and productive. In keeping quality it has no superior. Its superior keeping qualities combined with its sweet, rich flavor, attractive color and shape, are bound to make it a popular Fall and Winter variety. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 90 cts.

GOLDEN
HUBBARD

IMPROVED HUBBARD

Improved Hubbard.

This is the old standard squash, now grown through out the country. Flesh is deep golden-yellow and fine-grained, and whether boiled, steamed or baked, it is always richly flavored, sweet and dry. The vines are strong, of luxuriant growth and very productive, yielding large, heavy squashes weighing from ten to twenty-five pounds each.

The toughness of the rind makes it a good keeper.

The color varies somewhat, being sometimes green and sometimes red dish when mature; but the color and quality of the flesh is fixed and unchangeable—always a deep golden yellow or orange.

If properly stored they will keep until spring. Pkt. 5 c.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 90 cts., postpaid.

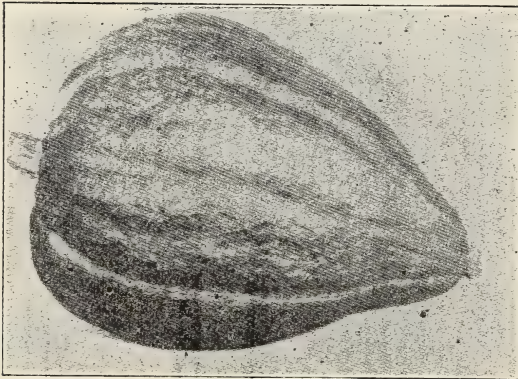

New Delicious.

This is one of the best flavored squashes in existence. In size it resembles the Hubbard. In thickness of flesh it surpasses nearly every variety. The color is a dark orange.

For table use no other variety compares with it in its remarkable combination of fineness and compactness of flesh, dryness, sweetness, and exceeding richness of flavor. It is a fall and winter squash.

Though excellent at any time, it does not acquire its best quality until winter.

The squash vary in color and form, but are uniformly delicious in flavor. The vines are strong and vigorous in growth and set the fruits quite freely. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. 90 cts.

NEW DELICIOUS

Golden Bronze.

Another good winter squash. It is a cross between the Bay State and Boston Marrow Squash. The fruits are oval in form, thickest at the blossom end; skin dark grayish green; deepening to bronze green when ripened. Flesh thick, deepest orange yellow in color, fine grained, and exceptionally sweet in flavor. It is early in maturing, a good keeper, and yields a large supply of fruits of uniform size and appearance. As a Squash combining the qualities desired for the table, and pies, this has no superior. Fruits average from eight to ten pounds each. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 80 cts.

The Greatest Vegetable Offer Ever Known. See Page 2. SIX LEADING VARIETIES WELL WORTH 60 CTS. SENT TO ANY ADDRESS POSTPAID FOR 25 CENTS. WE MAKE THIS EXCEPTIONAL OFFER TO GET YOU ACQUAINTED WITH JUNG'S QUALITY SEEDS.

Pumpkins.

Quaker Pie.

A most prolific variety. The fruits are broad pear-shaped or slightly oval in form.

The flesh is very thick and fine grained, of a beautiful golden yellow color, and in texture and flavor peculiarly adapted for pie making purposes.

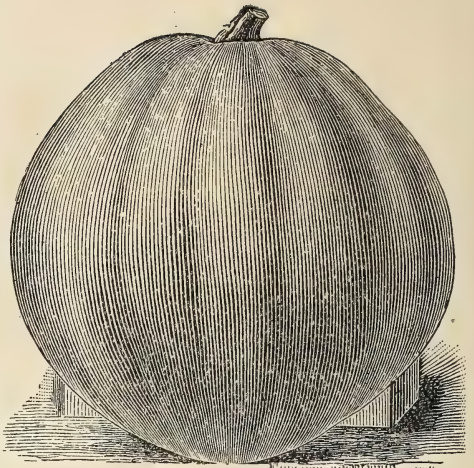

It is very prolific, a single vine often producing six or eight large pumpkins. As a winter keeper it is unexcelled, as the pumpkins will remain in perfect condition until late in the spring. It is sweet and delicate in flavor. Skin is a rich creamy-buff, which gives it a handsome appearance. It makes a superior quality of pies. Pkt. 5 cts.; oz. 10 c.; $\frac{1}{4}$ lb. 20 c.; lb. 70 c.

The Largest PUMPKIN in CULTIVATION True Mammoth.

This is the very best strain of the True Mammoth Pumpkin.

Fruits grow to enormous size, specimens have been grown weighing one-hundred pounds and over. The skin is a light yellow russet color, flesh very thick, bright-yellow, fine grained, sweet and tender and of excellent quality for pies. If you wish to see just how large a pumpkin you can raise try this variety.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 80 cts.

QUAKER PIE

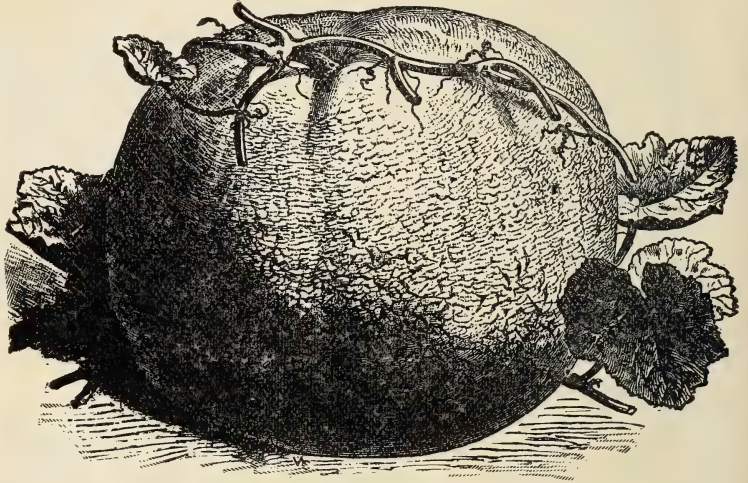

Field Pumpkin. Big Tom.

This variety is extensively grown for stock feeding, and is generally planted in with the corn.

Vines are of strong vigorous growth and wonderfully productive.

Fruits will average fifteen to twenty inches in diameter; round or oval in form. The skin is smooth and hard, of a reddish-orange color, slightly ribbed, with thick, rich orange-yellow flesh. It is the hardest of all pumpkins and is good for pies. When planted on good soil it yields enormous crops.

Oz. 5 cts.; $\frac{1}{4}$ lb. 15 cts.; lb. 40 cts.

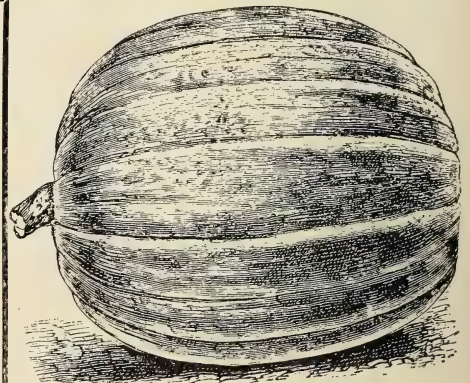

TRUE MAMMOTH

Radishes.

FRENCH BREAKFAST

BIG TOM

Our Radish seed is grown from selected and mostly transplanted roots. It is far superior to the California grown seed which is never transplanted.

French Breakfast.

An early, medium sized Radish: olive shaped, very crisp and tender, of a beautiful scarlet color, tipped with white. It grows about two inches long and is decidedly stump-rooted. A splendid variety for the table, for its excellent quality and beautiful color are unexcelled. It is a quick grower and an exceedingly popular variety. Pkt. 5 cts. oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 60 cts.

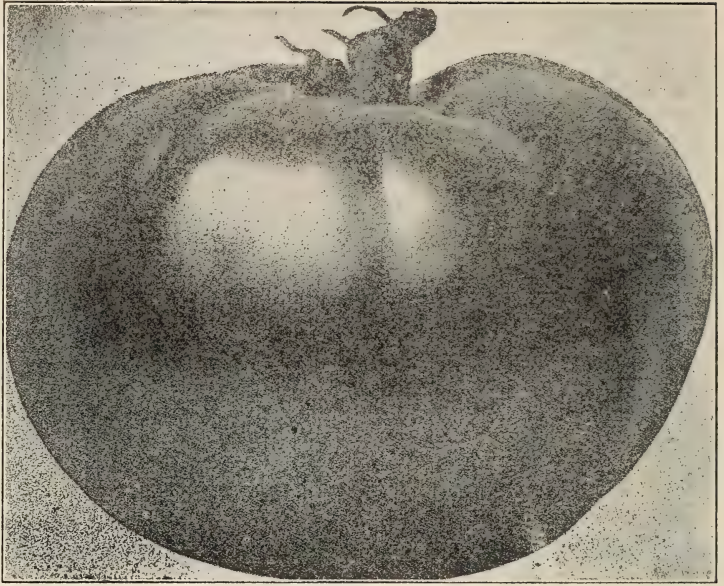

Jack Rose.

Next to Fairfield First it is the EARLIEST RED TOMATO IN THE WORLD. It is from three to five days earlier than Earliana, which means much additional profit when planted for market; as every trucker strives to have the earliest tomatoes.

The vines are vigorous growers and are well supplied with heavy foliage which protects the fruits from the sun.

The fruits are smooth, solid, and of good size some measuring four inches in diameter. It is almost all solid meat, producing but a very small quantity of seed and for this reason the seed will always be expensive. The later fruit on the vines is just as large and solid as the first.

If you want an abundant supply of large, solid, fine-flavored, rich-colored, meaty tomatoes do not fail to order JACK ROSE. Pkt. 10 cts.; oz. 40 cts. 1-4 lb. \$1.00.

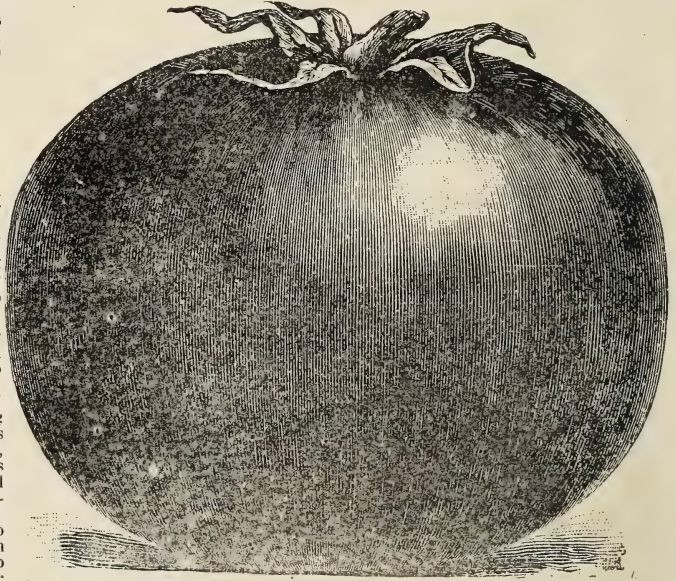

JACK ROSE

Truckers

Favorite.

The finest large-fruited purple tomato. Very uniform in size and shape, thick-meated and solid; ONE OF THE LARGEST TOMATOES GROWN. The fruits are of a beautiful purplish-red or pink color, always smooth and fleshy. They hold their size to the very last picking and ripen well to the stem. Vines are of strong vigorous growth, ripening the first fruits early. The vines are not subject to blight or rust, and produce enormous crops until killed by frost. Delightful in quality and flavor and unexcelled for slicing or cooking.

As a dependable main-crop pink or purple sort no variety in cultivation today is equal to Truckers Favorite. Pkt. 5 cts.; oz. 30 cts.; 1 lb. \$1.00.

TRUCKERS FAVORITE

Jung's "Fairfield Matchless" Tomato.

 See illustration in natural colors on front cover.

THE FINEST LARGE FRUITED RED TOMATO. THE MERITS OF THE OLD MATCHLESS ARE WELL KNOWN, BUT THIS, OUR NEW STRAIN IS A STILL

further improvement: in beauty of coloring, symmetry of form, large size and smoothness it is unequalled.

The vines are strong vigorous growers, and no matter how dry or hot the weather they seem to grow and flourish and produce immense crops of large, smooth juicy fruits. The fruits are truly immense in size, specimens having been grown measuring five inches in diameter, and the large size of the fruit is maintained during the whole season; they are free from core, of a rich cardinal-red color and free from cracks and blemishes.

The flesh is very solid, ripe fruits picked from the vines having kept in perfect condition for two weeks, this fact should not be overlooked by growers who ship their tomatoes. We offer Fairfield Crown Seed and no matter what price you pay you cannot get better seed. Pkt. 10 cts.; oz. 30 cts.; 1 lb. \$1.00.

A Truly Grand Tomato, Magnificent.

A truly magnificent red main-crop Tomato. It has been tried in various climates and different soils and always came out successfully. It is different from all other tomatoes in the following particulars. First, the plants root well from the very beginning of their growth. Second, as the result of this strong growth of root there is a large and vigorous growth of stalk to support the weight of the fruit. Third, as the result of the strong growth of stalk the spreading branches produce a great abundance of fruit from each plant. Fourth, the fruits are large, solid and smooth, easily prepared for market on account of its perfection. Fifth, the plants are hardy, can be set out early and not be injured by the cold if protected from frost. Sixth, the fruits ripen early and the later fruit on the vines is just as large and perfect as the first. The color is bright red; skin always smooth, free from cracks and blemishes. Flesh is of exceptionally fine flavor. Pkt. 10 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. \$1.00.

Tree Tomato. Dwarf Stone.

Early, extra large fruits, enormous yielder, bright red. The best variety for the home garden. It is the largest fruited dwarf or tree Tomato. The plants grow to a height of about two feet and are stiffly erect until they become overloaded with fruit. The fruit is produced in clusters of three to five, and as the growth is close-jointed each plant produces a large number. The tomatoes are of large size, and are very smooth and solid. Fruits have a solid meaty center and no hard core and produce but very little seed. We consider Dwarf Stone invaluable for the home garden, market garden, or for shipping purposes. Pkt. 5 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 90 cts.

Golden Dwarf Champion.

The famous Golden Dwarf Champion owes its wide popularity to its stiff, vigorous, upright growth, with fruit well above soil, its large fruit and beautiful color, and to the earliness with which it reaches maturity. Plants are bushy and compact, with heavy dark green potato-leaf foliage. The tomatoes are always smooth, round and solid, and of a beautiful lemon color. Its table quality is superior. Nothing makes a more tempting dish than red and yellow tomatoes sliced together. Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 90 cts.

Turnips.

Purple Top Strap Leaf.

The most popular sort. A general favorite with all, and more largely grown than any other turnip: will do well if sown either broadcast or in drills, and will form good sized bulbs in seven or eight weeks. Rather flat and of medium size. The color is purple above ground, white below; flesh, white, fine-grained and tender. Leaves short, narrow and erect. A heavy cropper and an excellent keeper. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 45 cts.

WHITE FLAT DUTCH

White Flat Dutch.

STRAP LEAF

A very popular sort for either table use or for market. The roots are of medium size, very handsome, smooth and of clear ivory-white both inside and out. The flesh is fine-grained, tender and of mild, sweet flavor. It is one of the best varieties for the family garden, as, in addition to the heavy crop assured by its adaptability for close planting, it will be found to be the best sort for spring use. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 50 cts.

IMPROVED
PURPLE-TOP
YELLOW.

Ruta Baga.

Improved Purple Top Yellow.

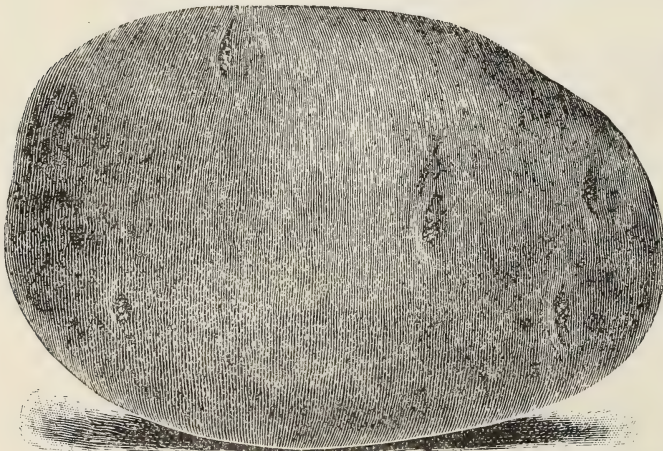

A hardy and productive variety widely grown for market and and stock feeding. It is of fine quality and keeps perfectly all winter, and even into the following summer. Bulbs are large, smooth, round and solid, with a small tap-root. Flesh richly colored, fine-grained and very sweet. Its shape is shown in the illustration. It is justly held in high esteem for both table and stock feeding purposes. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 50 cts., postpaid.

Lawn Grass.

Fairfield Special Mixed.

Our Mixture combines the very best varieties of grasses suited for the purpose of making a Lawn beautiful in appearance, durable and lasting, and which will stand the frosts of winter, and the hot sun of summer, showing a deep rich green at all seasons. The seed used is PURE and heavy and especially cleaned. This mixture weighs 25 to 27 pounds per bushel, is of strong vitality and makes a quick healthy growth. One pound of our mixture weighs as much as two quarts of most other seedsmen's brands. Pound, 35 cts., postpaid. Not prepaid, lb. 25 cts.; 5 lbs. \$1.25.

NORTHERN GROWN SEED POTATOES.

EARLY ACME

The seed potatoes we send out were strictly grown for seed purposes. They were grown in the North from the finest select stock, and are sure to produce large crops; all are carefully hand sorted. IT PAYS TO CHANGE YOUR SEED POTATOES.

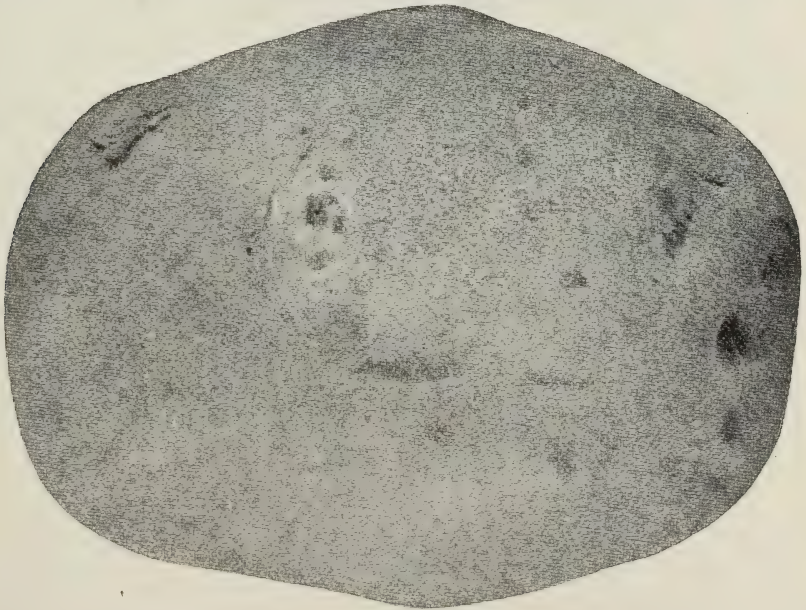

Early Acme.

Very similar to Early Ohio. Acme is a little earlier than Ohio, and perhaps a little more productive. It grows strong, upright vines, tubers compact in the hill, flesh very white and of high quality. Nearly everyone who has tried it likes it better than Early Ohio. Our supply is limited. Lb. 25 cts., postpaid. By freight or express: Pk. 40 cts.; bu. \$1.40.

Harvest King. A Money Maker Main Crop Potato.

We take pleasure in offering our customers this grand Potato, and are sure that everyone who tries it will be more than pleased with its fine quality, vigorous growth and great productiveness. It has proved itself to be of great value on account of its tremendous yield together with the fact that it produces but very few small potatoes. It is a magnificent sort, nice large, sound, white tubers which are of excellent quality for cooking or baking. Harvest King is just what the markets want and will always bring the best prices. We are offering this grand potato at a very reasonable price. Lb. 30 cts. postpaid. By freight: pk. 40 c.; bu. \$1.35.

White Victor.

Most profitable of all varieties for main crop. It is also the most productive potato, outyielding all other sorts. It is very uniform in size, being almost round, it makes a good looking variety. The skin is white, well netted and russeted, with few and shallow eyes. It is of unusually strong vitality as each cutting seems to make a large strong vine. White Victor is good when first dug and gets better as the season advances. For a spring potato it is hard to beat in quality. It is hard to beat for good cooking qualities, as a heavy yielder, and as a splendid keeper. Lb. 20 cts., postpaid. By freight or express: pk. 40 cts.; ½ bu. 70 cts.; bu. \$1.30.

Special Potato Offer.

1 peck of each: Early Acme, Harvest King and White Victor, \$1.25
1 bushel of each variety \$3.25.

JUNG'S NORTHERN GROWN DENT CORN.

We wish to call especial attention to our stocks of Clark's Yellow Dent and Wisconsin No. 8 Early Yellow Dent Corn. Our entire stock of these varieties was grown on the Fairfield Seed Farm and a finer bred lot of seed corn would be hard to find. It is all fire-dried, see cut of our new Seed House on page 1.

Clark's Yellow Dent.

Wis. No. 1.

The largest-eared, the deepest-kernelled, Yellow Dent Corn that was ever originated in Wisconsin.

Prof. Moore thinks Clark's Yellow Dent comes as near being a PUREBRED Corn as anything yet introduced. It is an early variety maturing in 100 to 115 days.

The stalks are strong vigorous growers generally bearing one good ear, being well supplied with large broad leaves, which make excellent fodder. The corn always breeds very true to type, uniform in color, size and shape of ear, always splendidly filled out at the tip and butt; kernels of a bright golden color, compactly set on the cob, and of unusual length for so early a corn. See cut.

A very noteworthy characteristic of this corn is that the ears hold their size almost to the tip instead of tapering out to a long slim point, or showing a bare cob. **Our strain of Clark's Yellow Dent is a great improvement over that generally sold, as it has been critically bred under rules approved by Prof. Holden, the noted corn expert.**

A heavy yielder and good sheller, shelling from 60 to 62 lbs. of corn from 70 lbs. of ears. We have grown this corn on the Fairfield Seed Farm for six years and it has always ripened.

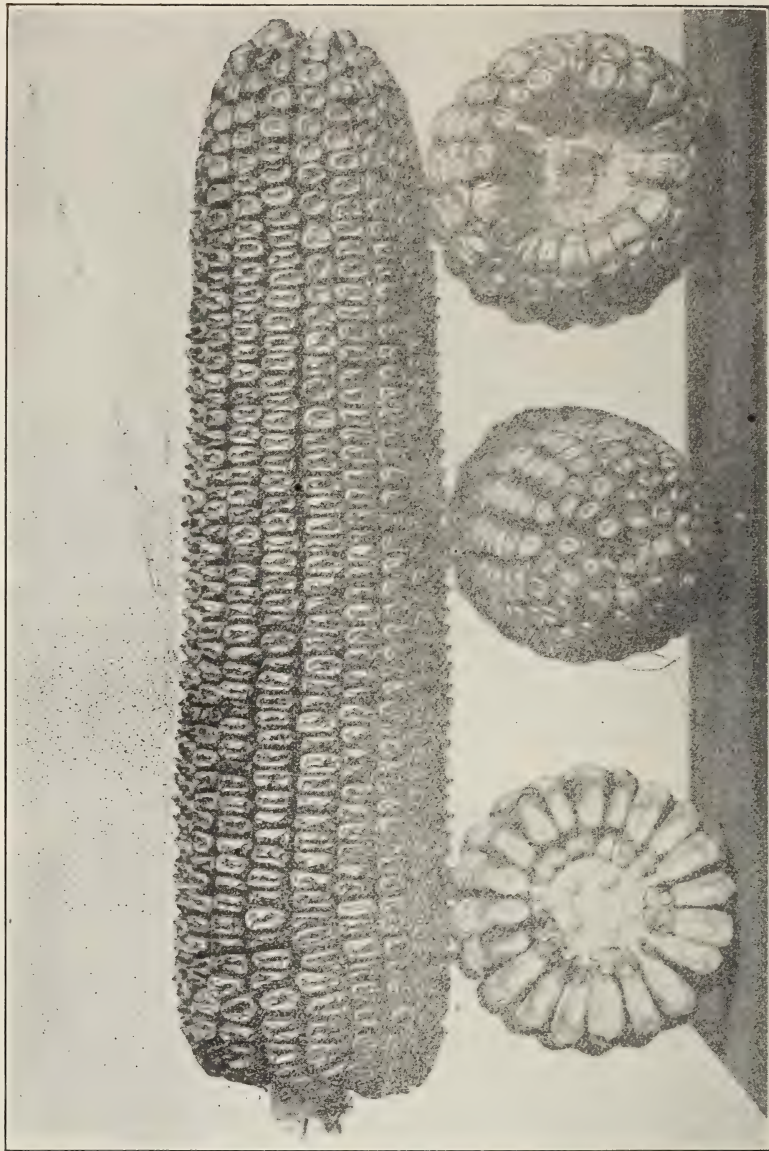

Price—on the ear: Bu. 70 lbs. \$3.00. Crates free. Shelled: Pk. 75 cts.; bu. \$2.80. Sample early by mail 25 cts. post paid.

Early Longfellow

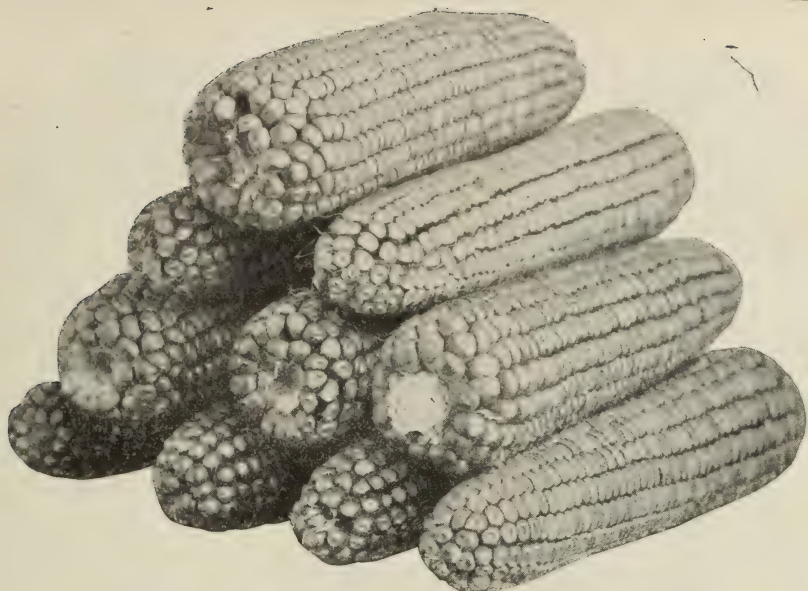

Flint Corn.

The most popular of all flint varieties. It is a beautiful 8-rowed flint, with slender, straight ears, 10 to 15 inches long. Kernels are large and wide, and cob very small.

Ripens in 75 to 80 days, and is very prolific. Shelled: pk. 60 cts.; bu. \$2.00. Nebraska grown.

A typical ear of Clark's Yellow Dent as grown on the Fairfield Seed Farm.

Grown on the Fairfield Seed Farm

Wis. No. 8. Early Yellow Dent.

This is the corn for Northern Wisconsin and similar latitudes. The commanding points for northern planting are: its EARLINESS, its ENORMOUS PRODUCTIVENESS, its ADAPTIBILITY TO A GREAT VARIETY OF SOILS AND CLIMATES.

Originally from Minnesota where it is known as Minnesota No. 13, Wisconsin No. 8 has been developed at the Wisconsin Experiment Station and is a great improvement on the Minnesota strain. By careful selection and breeding the kernels have been materially lengthened without sacrificing the extreme earliness. It fully matures on the shores of Lake Superior and will ripen anywhere in Wisconsin. Ears average seven to eight inches in length, with long kernels, very uniform in type and color, with remarkably well filled tips. It grows a medium-sized stalk with good leaf development and with practically no barren stalks. It will thoroughly mature in about 90 days on favorable soil and a good location and yield from 40 to 60 bushels per acre, producing often two ears to a stalk. This corn will be especially valuable to use even down in the corn-belt where for any reason late planting becomes necessary. Prices on the ear: Bu. \$3.00. Crates free. Shelled: Pk. 75 cts.; $\frac{1}{2}$ bu. \$1.40; bu. \$2.50. Sample ear by mail 25 cts., postpaid.

NORTHERN GROWN FARM SEEDS.

The Farm Seeds which we offer are uniformly of the VERY BEST grade, while the EARLINESS and TREMENDOUS PRODUCTIVENESS of NORTHERN GROWN SEEDS needs no comment. The greater part of these seeds were grown on the Fairfield Seed Farm. They were grown especially for seed, and are thoroughly cleaned and free from foul weeds. BAGS FREE, remember this when comparing prices.

SOW JUNG'S FARM SEEDS AND YOU WILL HARVEST A BUMPER CROP.

Early Amber Sorghum or Sugar Cane.

One of the leading fodder plants. It can be easily grown on any good corn ground, is sweet and tender and greedily eaten by cattle, horses and hogs. It is excellent for pasture, when grazed down it will quickly spring up again, thus a large amount of pasture may be obtained at a season when forage is scarce. Northern Grown Seed. Lb. 20 cts. postpaid. By freight or express: Lb- 10 cts.; 10 lbs. 50 cts.; 100 lbs \$3.75.

Field Peas. White Canada.

This is the best known variety and the one usually sown. They grow from 3 to 4 feet high and are very productive. Excellent for hog pasture or when fed green to milch cows. Pk. 70 cts.; bu. \$2.50. Write for special prices on larger quantities

Kherson, or Sixty Day Oats.

The earliest, the hardest, most prolific, strongest straw, heaviest grain and best yielding early Yellow Oats in cultivation. Although the name is "Sixty Day" it requires a little longer than sixty days to mature. Straw is very stiff and stands up well on strong land. Color is a bright golden yellow. The hulls very thin, in fact it is the thinnest hulled variety. They grow vigorously and ripen before there is any danger of injury by drought or hot weather as is often the case with the later kinds. The past four seasons it ripened as early as the barley, which is from one week to ten days earlier than any other sort. It is the earliest Oat. We offer Fairfield grown stock at the following prices. Lb. 25 cts., postpaid. By freight or express: Pk. 30 cts.; bu. 80 cts.; $\frac{1}{2}$ bu. \$1.75; 10 bu. \$6.25.

EARLY AMBER CANE

Oderbrucker Barley.

This is the greatest, heaviest, finest appearing, biggest stooling, longest eared, bearded, six-rowed Barley on the market today. It is a new variety introduced by the Wisconsin Agricultural Experiment Station in 1906.

Prof. Moore says: The most satisfactory Barley from all points of view grown on the station farm. It is a great improvement on the Manchuria, yielding from three to five bu. more per acre. It has a protein content of fifteen per cent, or nearly double the amount of protein found in many other varieties. This makes it a very valuable feeding barley, which is an important consideration with the leading farmers and stockmen, who are now appreciating more and more the value of barley as a feed for all kinds of stock. The straw is strong and stiff which gives it more power to withstand lodging.

It will certainly be of great value to every farmer who tries it.

We have an exceptionally fine stock of clean, pure Oderbrucker. Kernels are large, plump, and almost snow-white in color.

Lb. 25 cts., postpaid. By freight or express: pk. 40 cts.; bu. \$1.20; 2½ bu. \$2.80. Write for prices on larger quantities.

Swedish Select Oats.

THIS IS THE FINEST, STRONGEST, HEAVIEST, LARGEST YIELDING, MOST PLUMP WHITE OAT EVER GROWN IN AMERICA. THIS VARIETY is of Swedish origin, it was introduced

in this country by Prof. Carlton of the U. S. Dept. of Agriculture.

Prof. Carlton sent a sample of these oats to Prof. R. A. Moore, Madison, Wis., who after testing them for four years with 36 other varieties pronounced them **THE MOST SATISFACTORY OF ALL.** The great root development is one of the chief characteristics of the Swedish Oats which enables it to withstand drought better than any other variety. The straw is coarse and is noted for its power to withstand lodging.

It is early; the kernels are large and thick, white, plump and heavy, weighing from thirty-six to forty pounds per measured bushel, with an exceptionally thin hull.

This variety seems to be well adapted to high land, the best results being obtained on clay loam. **We have a fine bright thoroughly cleaned stock of these heavy, plump Swedish Oats which will certainly please anyone who wants stock of this famous variety.**

Lb. 25 cts., postpaid. By freight or express: Pk. 25 cts.; bu. 85 cts.; 2½ bu. \$2.00 10 bu. \$7.50.

We will be pleased to quote you special prices on larger quantities. Samples mailed free on request. Bags free.

A head of the great Swedish Select Oats

GERMAN MILLET.

In the North Millet is grown almost altogether for hay, and for that purpose Southern grown seed is much the best. It grows taller than does that from Northern seed, and that means better hay. It is finer than that from Northern seed, and that means better hay.

We offer Genuine SOUTHERN GROWN SEED. German Millet is very sweet, palatable, and when fed to dairy cows produces a large amount of milk. On good rich soil it grows four to five feet

high. It is very tender if cut at the right stage, which is when it is in full bloom.

A good yield is from three to five tons of hay to the acre. Lb. 20 cts. post paid.

Not prepaid: pk. 50 cts.; bu. \$1.75. Write for prices on larger quantities.

GERMAN MILLET

White Kaffir Corn.

An excellent fodder corn.

It grows 5 to 6 feet high, with a straight, upright growth and numerous broad leaves. The stalks brittle and juicy, not hardening like other varieties of sorghum. It makes excellent fodder, either green or dry, which is highly relished by cattle and all kinds of stock. Sometimes 50 to 60 bushels to the acre. Cast or in drills like corn. Lb. 20 cts., post paid. 10 cts.; 10 lbs. 40 cts.; 100 lbs. \$2.75. Write for special prices on larger quantities.

KAFFIR CORN

The seed crop is also heavy. Can either be sown broadcast or in drills like corn. Not prepaid: lb. 10 cts.; 10 lbs. 40 cts.; 100 lbs. \$2.75. Write for special prices on larger quantities.

Dwarf Essex RAPE.

The greatest of all forage plants. It is ideal for sheep pasture, and is now also largely sown for cattle and hogs. It furnishes an immense amount of green feed, and its nutritive value is nearly twice that of clover. Under favorable circumstances it is ready for pasturage in six weeks from the time of sowing.

Dwarf Essex Rape thrives best on good soil, rich in vegetable matter. Some firms ask less for their Rapeseed than we do, but we handle only **THE VERY BEST SEED**, which is sure to give satisfaction. Lb. 20 cts.; post paid. Not prepaid, lb. 10 cts.; 5 lbs. 40c.; 25 lbs. \$1.75; 100 lbs. \$6.25.

Jung's Fancy Recleaned Clover and Grass Seed.

Nothing is more important to the farmer than that the seed he sows be pure and free from foul weeds; the seed should also be plump and of strong vitality to insure a good stand.

We handle only one grade of these seeds and that is our famous

FAIRFIELD BRAND

which is the very best to be had.

Samples of Farm Seeds free.

Wisconsin Grown Red or Medium Clover.

We have an unusually fine stock of Medium Clover Seed. It is bright, pure, of high germination and is free from foul weeds.

This is the standard Red Clover and is a dependable all-round variety for farmers and stockmen. It makes two crops a year. The first is usually cut when it is in bloom for hay; the last crop may be harvested for seed, cut for hay, or plowed under to add fertility to the soil. Clover adds greatly to the fertility of the soil. Lb. 35 cts., post paid. Not prepaid: lb. 25 cts.; pk. \$2.76; bu. \$10.25. Price subject to change.

MEDIUM CLOVER

Jung's Genuine Alsike

Wisconsin Grown Alsike CLOVER.

WE HAVE THE FINEST STOCK OF ALSIKE SEED EVER GROWN. THIS SEED HAS BEEN RAISED ON OUR FAIRFIELD FARM AND IS 99.2 PER CENT PURE, GOVERNMENT TEST. BE SURE TO SOW JUNG' GENUINE ALSIKE SEED.

Alsike is the hardiest of all Clovers. It adapts itself to all kinds of soils, and resists extremes of wet or drought alike. It is more leafy than Red Clover and makes a finer and better hay, especially when sown with Timothy. Alsike is the only clover that will produce a good crop and not kill out on wet land. It is deliciously fragrant and highly nutritious. On good soil it will grow 4 feet high. Lb. 35 cts., postpaid. Not prepaid, lb. 25 cts.; pk. \$2.75; bu. \$10.25. Price subject to market change.

ALFALFA

Montana Grown ALFALFA Seed.

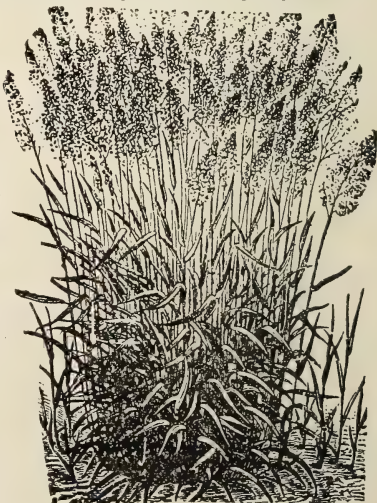

A clover-like leguminous plant of great importance as a hay and forage crop, nutritious and rich in protein elements. It grows two to five feet high and roots eight to twelve feet deep. It needs one season to become established, after which it yields enormous crops annually for many years. Two to six cuttings per season, aggregating three to eight tons cured hay, are harvested, according to conditions and locality. It does well on all good rich soils, except heavy clay, if well drained. It is a perennial plant, lasting many years under good treatment. It should be tried by every farmer and dairyman. **We offer MONTANA grown seed which is recommended by the Wisconsin Agr. Experiment Station as being the best for all localities.** Lb. 35 cts.; 3 lbs. \$1.00 postpaid. By freight or express: Pk. \$3.90; bu. \$15.00. Price subject to change. Write for prices on larger quantities.

Timothy.

As a crop for hay Timothy is probably unsurpassed by any other grass. It is greatly relished by all kinds of stock, especially horses. It yields more nutritive matter than any other grass or forage plant. It is not suited for a permanent pasture as it will run out in the course of a few years. It is however well adapted to early spring grazing as it starts up quickly in the spring, and in favorable fall weather can be pastured in the autumn as well. The largest crops of hay are raised on rich land. It is not suited for light, sandy soil so well as some other grasses. **The most important point in the growing of Timothy is the selection of good seed.** Poor seed, besides containing weed seed will not all grow. Lb. 20 cts., postpaid. Not prepaid: lb. 12 cts., bu. \$5.00. Subject to change.

RED TOP.

A valuable grass for moist, rich soils where it thrives very luxuriantly. It is a good variety to sow with Timothy and Clover for meadow or pasture and is more permanent than either of the other two. It should be fed close, as if it is allowed to grow up to seed, the cattle dislike it. On good soil it grows about three feet high. It has been grown successfully even on alkali soil where other grasses failed. Lb. 35 cts., postpaid. Not prepaid: b 20 cts.; 10 lbs. \$1.85. Write for prices on larger quantities.

JUNG'S UNRIVALED FLOWER SEEDS.

Sweet Peas
old-fashioned flowers are still popular, new and improved varieties have been developed, with larger and finer blossoms.

Phlox Drumondii

Innocence Aster

You will not be disappointed with our FLOWER SEEDS.

The same great care and selection governing the growing of our Garden and Farm Seeds is exercised in the growing of these Flower Seeds.

If our customers could only see the glorious beds of Asers, Salvias, and other flowers growing on the Fairfield Farm they would grow more flowers.

There are no more satisfactory flowers in the garden than those grown from seed, especially the easily grown and brilliant flowering annuals. The beautiful shrubs and lilies, of course, have their place, but are far more expensive than a package of seed which will furnish a large number of plants with usually enough for one's garden and some to spare. While the

JUNG'S SUPERB ASTERS.

Asters are our great Specialty in the Flower seed line and the degree of perfection to which we have brought the strains we are offering is unsurpassed.

WE ARE THE LARGEST GROWERS OF ASTER SEED IN THE NORTHWEST.

No other flowers can approach the Aster in beauty, color, form, or profusion of bloom. They are very hardy, easily grown, and may be had in bloom from early summer until severe frosts. **WE ARE ASTER SPECIALISTS** and our seed of these grand flowers is absolutely unexcelled.

Jung's Special Strain of Giant Comet Asters.

This is undoubtedly the finest strain of Chrysanthemum flowered Asters.

The plants attain a height of about twenty inches and bear their large graceful flowers on stems from fifteen to eighteen inches long. The immense flowers are from four to five inches across, while the long petals are curled and twisted, forming perfect half-globes.

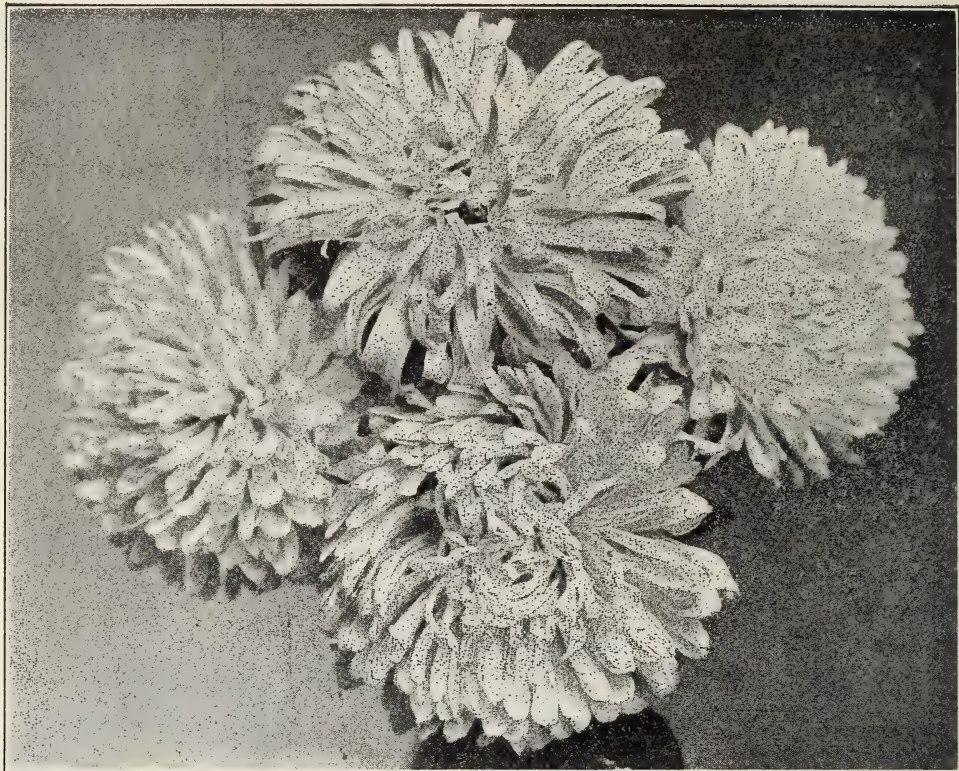

Florists have been deceived by mistaking them for Chrysanthemums. The blooming season is most opportune, coming between the Extra Earlys and the Late Branching sorts, thus enabling the Aster growers to have a fine display from mid-summer until late frost. It is one of the most perfect Asters and should be included in every collection.

**WHITE
ROSE-PINK
SHELL-PINK**

Each 10 cts. per pkt.
One pkt. each color for
25 cts. Mixed colors
10 cts.

Three great Asters are fully described on inside back cover.

JUNG'S SPECIAL GIANT COMET WHITE

INVINCIBLE

MIKADO SHELL-PINK
CHRYSANTHEMUM FLOWERED

SUPERB LATE BRANCHING

JUNG'S SUPERB Late Branching ASTERS.

We have been growing this variety on our Fairfield Seed Farm for a number of years and by careful selection have brought it to a state of perfection where it is unexcelled.

The plants form strong stocky bushes about two feet in height, bearing on long stiff stems their handsome flowers, which measure from four to five inches across.

The petals are gracefully curved towards the center and do not have an exposed yellow center as is the case with many of the strains of late asters now offered.

This variety is unexcelled for bedding or bouquets.

We offer three beautiful colors.
PURE WHITE—Glistening white.
SHELL-PINK—Extremely dainty.
ROSE-PINK—A truly handsome color.

Each, 10 cts. per pkt. Mixed Colors 10 cts. One
pkt. each color 25 cts.

Mikado Shell-Pink.

The premier of all Pink Asters.

Petals are narrow, very long and gracefully reflexed. The outer petals show to their full extent, while gradually toward the center they bend and curl across each other in such magnificent disorder as to make the fullest Aster we have ever seen. In color it is the most exquisite shade of pink. For a mid-season pink this Aster is without a rival. The plants are unusually vigorous, succeeding abundantly under adverse conditions. It is not uncommon to find plants with a dozen long, strong, graceful stems, each crowned with flowers from four to six inches across.

Pkt. 10 cts.

JUNG'S Innocence.

THIS IS WITHOUT ANY DOUBT THE EARLIEST ASTER IN CULTIVATION TODAY.

It is a few days earlier than Queen of the Earlies, while for beauty of flower it equals the later sorts.

Instead of running to leaves the entire energy of the plant seems given to the production of 8 to 10 giant fluffy flowers. The plants are of sturdy, branching habit, 15 to 18 inches tall, and bear their handsome, snow-white flowers on long stems, making it valuable for bouquets. The flowers measure three to four inches across which, with their long recurved petals, give them an exceedingly graceful effect. See cut on page 43. Pkt. 10 cts.

Invincible.

These Asters were awarded a Gold Medal at the Jamestown Exposition. A superior type, of strong, robust growth, producing on long stems, flowers of immense size and unsurpassing beauty.

The flowers are the most beautifully formed of all large Asters, being perfect in outline and having the petals curled well over the center. Petals are of thick durable substance, making it invaluable for cut-flowers, as they last a long time before wilting. White, Pink, Shell-pink, Purple and Crimson. Each 10 cts. per pkt. Mixed colors, 10 cts. One pkt. each color, 40 cts.

Chrysanthemum Flowered.

This grand new Aster is in a class by itself, being formed altogether different than any other variety.

Its beautiful form is well shown in the above half-tone which was accurately engraved from a photograph taken of flowers grown on our Fairfield Seed Farm. The flowers are truly gigantic in size, and closely resemble chrysanthemums, hence the name. It is of the most most beautiful color known in Asters, being a very delicate sea-shell pink. Well grown flowers measure five inches across and are borne on long stems making them invaluable for cut-flowers and bouquets. Petals are long and curled. You will be more than pleased with it. Pkt. 10 cts.

JUNG'S INTERNATIONAL ASTERS

JUNG'S International Mixed Asters.

The finest mixture of ASTERS ever offered by any seedsman.

This superb mixture is composed of the very best varieties and contains practically every shade and color known in Asters, such as pure white, white changing to rose, shell-pink, rose-pink, red, carmine, violet and purple. This mixture includes, Jung's New Fairfield, Innocence, Jung's American Beauty, Vick's Mikado, Violet King, Chrysanthemum Flowered, Jung's Superb Late Branching, Invincible and many other varieties. **It is truly an UNRIVALED MIXTURE of these, the most showy and beautiful of all flowers.**

Catalogue value .60

From no other seedsman can such a fine assortment be bought for only 30c.

BALSAM. Defiance Mixed.

A favorite quick growing annual. The plants form symmetrical, well-branched, erect bushes, about two feet high. The branches are well covered with the beautiful double flowers. The color includes white, rose red, scarlet, crimson, purple, lilac and violet. Although such generous bloomers, they are shy seeders. This variety is distinctly *Camellia*-flowered. Our strain of these is unsurpassed for size of blooms, doubleness, and beauty of flowers. See cut on page 45. Pkt. 5 cts.

CANDYTUFT. Empress.

Candytufts have long been among the most popular bedding annuals.

This is the largest flowered, pure white variety in cultivation. Strong, free growers, from six to eight inches high, producing large trusses of flowers on candelabra formed branches. Excellent for bedding and ribbon borders, remaining in bloom throughout the summer. Pkt. 5 cts.

COSMOS. Early Summer Flowering.

Grace and brilliancy are the characteristics of this pretty annual.

The beautiful flowers with their deep broad petals rise from a cloud of fine feathery foliage. By starting the seed of this variety early they will

commence to blossom in June and continue to bloom until cut down by frost. They are of compact bushy growth, about

four feet high, with flowers fully as large as the old variety.

The flowers are of various shades, ranging from pure white to purplish crimson. Both foliage and flowers are unsurpassed for bouquets and vases.

They are easily raised and make a grand display. It is admired by all. Pkt. 5 cts.

DAISY.

German Double

Mixed.

These famous little double daisies are held in universal esteem. They bloom profusely, especially in cool weather.

They are easily raised from spring-sown seed, and come into bloom in a short time.

Among the most charming spring flowers, they are indispensable for cool shady places.

They are in high favor for open air edgings and borders.

Height 6 inches. Pkt. 5 cts.

DIANTHUS. Fireball.

Flowers are double crimson and their beauty is scarcely surpassed by any other flower. Pkt. 5 cts.

CANDYTUFT

COSMOS

CALIFORNIA POPPY.

Golden West.

Extremely handsome, low and quick growing annual plants, with finely cut foliage and cheerful blossoms. The flowers are light canary yellow with a large rayed blotch of deep orange at the base of each petal. They are beautiful and variously formed. Some are flat and wide open, some saucer shaped, others very deep with flaring edges. Plants are about one foot high and easy to grow. They are ornamental and bloom until killed by frost. Pkt. 5 cts.

CALIFORNIA POPPY

Everblooming Annual HOLLYHOCKS.

Every garden may now be glorified with stately Hollyhocks grown as easily and flowering as soon from seed as any garden annual.

The plants are of healthy and vigorous growth and naturally branching in habit, the center spike attaining a height of from 5 to 7 feet.

The diversity of forms and colors among the flowers affords many delightful surprises.

Some plants produce densely double flowers without guards, others with guard petals; there are semi-doubles, then single sorts with small double centers, others flounced, and all flowers are usually very large, some measuring five inches across. In colors there is also great variety, some richly brilliant, others dainty and exquisite, ranging from black, maroon, wine-red to orange, pink and white.

The flower buds are borne in clusters which vary in maturity from the developing bud to the expanding flower; this accounts for the remarkably long blooming period. The plants may be shaped by pinching off the shoots. They flower profusely until frost. Pkt. 10 cts,

DIANTHUS.

Fairfield Finest Mixed.

These hardy annuals may be ranked among the fairest gems of our flowers, as few flowers can equal them in beauty or profusion of bloom. They are of the richest and most varied colors. The plants spread rapidly, and make ornamental masses of growth. They may be sown in the open ground when danger from frost is over, and in a few weeks they are masses of bloom, continuing so until frost.

Our mixture includes all the best single, double and large flowering varieties. Pkt. 5 cts,

DIANTHUS

HOLLYHOCK

MIGNONETTE. BISMARCK

MIGNONETTE. Bismark.

A grand new variety, bearing red flowers nearly double the size of the popular Machel variety. The flowers are pyramidal in shape and from 6 to 8 inches long, well colored and highly perfumed. It makes fine bouquets and is well adapted to pot culture. Pkt. 5c.

Special Mixed.

This is a truly superb mixture; it contains seed of the above variety as well as all the standard sorts and latest introductions, there being red, yellow and white colors. Pkt. 5c.

MARIGOLD.

Lemon Ball. The extra large flowers are perfectly rounded, or "ball-like" in form. The petals are heavily rolled and are crowded so closely together as to appear lacinated. The color is a clear canary-yellow. They resemble large Yellow Double Dahlias, only they are produced more abundantly and for a longer season.

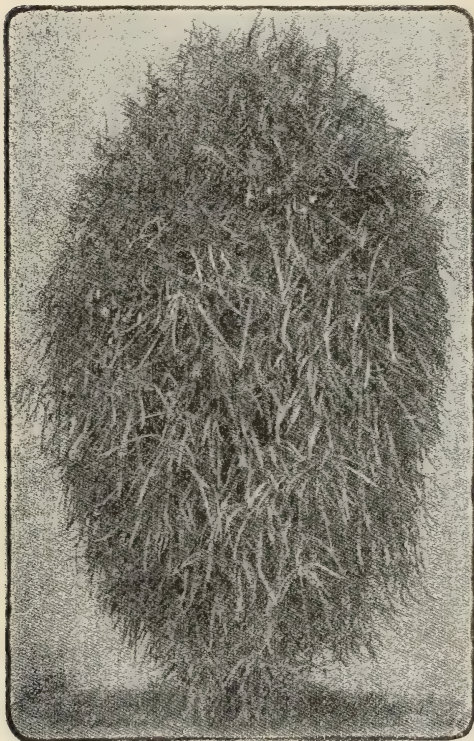

The plants stand erect, branch freely, and grow about two and one-half feet high. They do best in a sunny place. Pkt. 5 cts.

Marvel-of-Peru or Four-O'Clock.

Finest Mixed. A well known and deservedly favorite flower.

Produces large, convolvulus-like flowers; white, yellow, crimson, blue, striped and etc. The flowers open late in the afternoon and until the next morning.

Makes a nice hedge if set a foot apart. Pkt. 5 cts.

KOCHIA TRICOPHYLLA
A GRAND HEDGE PLANT.

Kochia Tricophylla.

An annual hedge plant which has become very popular. It makes a beautiful specimen plant, or grown in hedge form it is equally attractive. Its stately form is shown in the illustration. It grows about three feet tall, forming a perfect pyramidal-shaped cypress bush, with fine, feathery, light green foliage.

About the beginning of September, it changes to a lovely crimson hue and for this reason is often called "Burning Bush". The stems are clothed with slender light green leaves.

The beauty of this plant is in its shape and colors. Worthy of high recommendation. Pkt. 5 cts.

BRILLIANT BEAUTIES DWARF NASTURTIUMS.

Brilliant Beauties.

The plants are of strong vigorous growth, erect habit and beautifully rounded form. The leaves on different plants range from light green to a rich purplish tint. Of quick growth; they begin to bloom early in the summer and continue to flower profusely until killed by frost.

So greatly diversified are the colorings that it seems almost impossible to find two plants bearing flowers alike. The flowers are not only wonderfully brilliant but also of large size.

Pkt. 5 cts.; oz. 20 cts.

Tom Thumb Mixed.

This mixture is composed of choice flowering varieties and is properly blended. They are of dwarf compact rounded growth, about nine inches in height and slightly greater in diameter. They resist heat and drought, grow vigorously and flower freely all summer and fall. Flowers are of many different colors, and are shown to great advantage among the richly variegated foliage. They are of the easiest culture. Pkt. 5 cts.; oz. 20 cts.

NICOTIANA.

Affinis.

The plants of this strain are quite compact, averaging two feet in height; pyramidal in form and bloom profusely. Flowers are pure white and are borne on long terminal tubes. Plants are highly ornamental and have handsome foliage. The flowers open in the morning and evening. It is so fragrant that a small bed will perfume the surrounding atmosphere. Pkt 5 cts.

TOM THUMB MIXED

Tall or Climbing NASTURTIUMS.

Giant Flowered Mixed.

GIANT FLOWERED TALL NASTURTIUM
PANSIES.

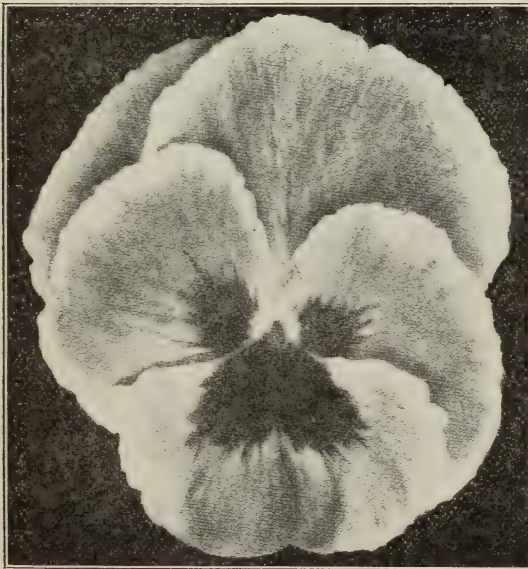

Hercules Giant.

The wonderful size, colors and veinings of this lovely large pansy are simply unsurpassable. The flowers are of thick heavy texture. The colorings and markings are widely varied, some flowers being nearly self-colored in the richest tints of purple-carmine and brown, relieved by delicate shadings of a brighter or contrasting color; others are boldly margined with white, cream, golden yellow or soft rose; while still others have silvery grounds heavily blotched at the base of each petal with a dark rich shade.

Plants are of sturdy stocky growth. Pkt. 10 cts.

Large Flowering Mixed Pansies.

This mixture is composed of the finest large flowering varieties, containing some of the richest colors. Pkt. 5 cts.

JUNG'S GIANT FANCY

HERCULES GIANT $\frac{3}{4}$ natural size

Jung's Giant Fancy

Mixed PANSIES.

This "Fancy Mixture" contains seed of the largest, richest and handsomest pansies known to the horticultural world. The well

formed expanded flowers are uniformly of the largest size and of fine substance; they are borne on long stiff stems well above the heavy deep-green foliage. The colors are rich and varied, such as white, cream, yellow, deep-orange, mahogany, claret, rose, reddish-bronze, lavender and light blue, each petal is distinctly blotched. The compact, rounded plants are of sturdy habit and so deep rooted that they bear the gigantic flowers profusely and continuously. The petals are of thick heavy substance, and in some flowers expand flat into circular blossoms of immense size; others are of daintier coloring, with the edges frilled and folded, giving effect of finely double flowers. Pkt. 15 cts.

The largest and finest Sweet Peas in the World fully described on page 55.

PANSY. Giant Masterpiece.

This grand pansy is remarkable for having its petals waved or folded, giving it the appearance of a double flower. The truly giant-sized flowers are of the most striking character; the petals being of a rich velvety substance and heavily ruffled. The colors are mainly dark rich shades bordered, blotched or marked in ray-like veinings with contrasting colors. The mammoth size, richness and beauty of colorings, combined with the distinctly frilled or ruffled character of the petals, make the Masterpiece one of the most interesting novelties in pansies ever developed. Pkt. 10 cts.

PHLOX DRUMMONDII

The Best of all Bedding Plants.

PHLOX DRUMMONDII.

Grandiflora Mixed.

This superb strain is notable not only for variety and brilliancy of colors, but also for the perfection and size of the flowers. Many of the single flowers are so large that they will nearly cover a fifty cent piece. The colors range from pure white to the deepest blood-purple or crimson, while the clear eye of some of the flowers is peculiarly marked. In good rich soil they will grow eighteen inches high, and for a mass of splendid colors no flower will give a more satisfactory return for so little cost. No garden should be without a bed of these, the most showy of all dwarf growing annuals. The flower type is shown in the illustration. Pkt. 5c.

NEW DWARF PHLOX.

Nana Compacta,

This splendid race of annual phloxes cannot be overpraised for brightness and beauty.

The plants are always lavishly covered with large flowers of the most brilliant hues. Nothing better for bedding purposes is listed in this catalogue. They succeed everywhere, and are in universal favor for summer flowering purposes. This type combines the size of the individual flower and head of the finest Grandifloras with dwarf compact bushes, six to eight inches high, forming dense masses of bloom all summer.

They are very desirable for edgings and ribbon beds and useful for pot culture. The colors include pure white, deep and showy red, rose, with white eye and other shades. They are quite hardy, but are to be treated as annuals. Finest mixed, pkt. 5 cts.

A Side View, from a Photograph, of GIANT MASTER-PIECE.

Iceland Poppies. See page 51

POPPIES.

Double Featherball.

These double-fringed annual Poppies are very beautiful; they belong to the carnation-flowered type, the large flowers having the same globe-shaped formation, with gracefully fringed-edged petals like big balls of slashed tissue paper or feathers.

Plants are of branching, stocky, growth, only 15 to 18 inches high, each plant carrying several of these exquisite flowers. The great variety of coloring ranges from the most gorgeous down through shades of pure white.

When grown in masses the floral panorama is of almost unimagined beauty. They are of the easiest culture.

Mixed colors. Pkt. 5 cts.

Re-selected Shirley.

The most showy of all Poppies. A bed of them in your garden is a sight to behold.

Flowers about three inches across, exceedingly graceful and elegant; the colors are pure soft and varied and range from pure white, bluish rose, delicate pink and carmine, to orange-scarlet, and bright sparkling crimson, occasionally blotched with white.

All who admire the delicate beauty of the Shirley Poppies will be delighted with this re-selected strain of the finest colors and most charming markings. Few flowers can show such a grand array of colors.

Pkt. 5 cts.

Iceland Poppies.

The Iceland Poppies are perennials, blooming the first season from seed.

The fragrant, elegant, crushed-satin-like flowers are produced continually from June to October.

They are of graceful neat habit, with bright green fern-like foliage, formed in tufts, from which issue slender stalks, about twelve inches long, bearing their brilliant flowers in endless profusion.

Their long stems and lasting quality make them invaluable for cut flowers.

The flowers last fully a week if cut as soon as open. See cut on page 51. Pure White, Yellow, and Orange. Pkt. 5 cts.

DOUBLE FEATHERBALL

PETUNIA. Large Flowering Mixed.

No annual flower is more widely used than the petunia.

It begins to bloom early, and lasts the whole season, until killed by frost.

Most of the flowers are exquisitely ruffled or fringed on the edges, and are of enormous size, but their great merits lie in the tremendous variety of colors, markings, blotches and stripings, in the most grotesque and beautiful combinations. Some of the colors are rich and gorgeous and others of lovely delicate shades.

Pkt. 10 cts.

PETUNIA

SALVIA. Splendens.

"The most dazzling scarlet flower".

The handsome bushes are three feet high and as much in diameter when of full size.

Single plants often bear one-hundred spikes of flowers, each about eight inches long.

It is excellent for filling large beds or for borders in the garden. It blooms continuously from early in August until the first killing frost. Nothing is equal to a bed of these flowers which for months is a blaze of insensibly brilliant scarlet.

Pkt. 5 c.

SALVIA SPLENDENS

Poor seed invariably causes loss and disappointment. The CHEAPEST never is the best. The BEST always is the cheapest.

A GRAND BEDDING PLANT.

SALVIA. Bonfire. One of the grandest varieties in cultivation.

A bed of them will surpass the finest scarlet geraniums in brilliancy and continuous bloom. The plants are compact

growers, attaining a height of about thirty inches. Single plants sometimes carry two-hundred spikes measuring from eight to twelve inches in length. Flowers are a brilliant dazzling scarlet. From

the time they first begin to flower the plants are never out of bloom until killed by frost. We know of nothing that will equal the gorgeous effect of a row or bed of these Salvias, when in full bloom; the waving masses of glistening scarlet against green surroundings of lawn or foliage is matchless. Pkt. 10 cts.

Sunflower. Chrysanthemum Flowered.

SALVIA BONFIRE

Grows seven feet high.

Perfectly double; the color is the brightest golden yellow.

The plants branch and afford fine long stout stems for cutting. This gigantic Sun-

flower will be of great value for the hardy garden and herbaceous border. The flowers are so perfect in form that they resemble Chrysanthemum flowered Asters with long stems. This is the very best variety. Pkt. 5 cts.

SUNFLOWER

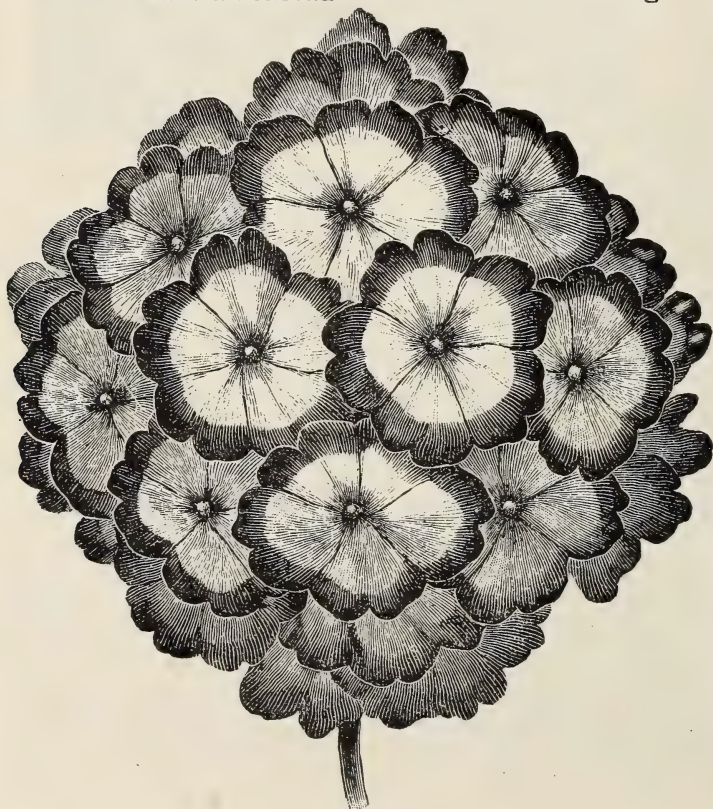

SWEET WILLIAM.

Fine Single Mixed.

Well known, hardy, free-blooming perennial plants. Old-fashioned favorites, now greatly improved.

They produce masses of lovely, brilliant, sweet scented flowers through a long period, making a splendid effect in beds.

The plants grow about one foot high and form fine clumps. This strain produces very large florets in greatest profusion and a great variety of extremely rich colors, including blood-crimson, salmon, pink, white and many others. Pkt. 5 cts.

VERBENA

VERBENA.

Fairfield Famous Mixed.

A choice annual, six to twelve inches high, indispensable for bedding purposes. The average trusses measure nine to twelve inches in circumference and the individual florets on properly grown plants over one inch across—or larger than a silver twenty-five cent piece. They bloom freely, are vigorous in growth, and contain beautiful new colors and shades. For garden beds and massing these verbenas are unrivaled; flowers of the most brilliant colors produced continually from spring until late in the fall.

Although perennials they bloom the first season from seed. Pkt. 5 cts.

GLADIOLUS.

There is no flower of such easy culture, embracing the great range of color with endless combinations and variety, to equal the Gladiolus. It is rightfully called the people's flower. Our bulbs are of the finest quality and will give bountiful satisfaction the first season. The bloom is continuous from end of July until frost. Any good garden soil will grow Gladiolus. Cultural instructions sent with each order.

Golden Queen. A new variety of great beauty.

It is a color hard to describe, indeed, it must be seen to be fully appreciated. It is of a rich lemon yellow color, having a rich crimson spot on the two lower petals, and a very slight tinge of pink in the upper petals, forming one of the most handsome Gladiolus known. Flowers are of truly gigantic size and a large number of them are open at a time.

It is of the branching type, often producing three spikes of flowers on one stem. The plants are strong and healthy and grow about two and one-half feet high. You will be more than pleased with the results of this grand variety. 10 cts. each: \$1.00 per dozen.

Augusta. A splendid new Gladioli.

Flowers are of perfect paper-white, with a slight pink shade on lower half of the petal. The spike is set solid and perfect, with the flowers from top to bottom. 5 cts. each: 50 cts. per dozen.

AMERICA

George Paul. A superb variety. A very strong and vigorous grower. Flowers are amaryllis-like and of enormous size, sometimes measuring five inches across. Flowers are a deep rich crimson, slightly stained yellow, spotted with crimson. 10 cts. each; \$1.00 per dozen.

Brenchleyensis. This is an old standard sort, and one of the best for bedding where one shade of good scarlet is desired. Flowers are pleasing and attractive and grow in profusion on strong solid spikes which are covered with blossoms from top to bottom. 5 cts. each; 45 cts. per dozen.

America. A beautiful shell-pink. By far the most vigorous and easily grown Gladiolus known. Very strong and healthy, with luxuriant dark green foliage and a freedom of growth and flowering surpassing all others. Spikes two to three feet long, with a great number of large spreading blossoms all facing one way and showing an exquisite shade of glistening soft lavender pink.

Single blossoms measure four inches across and as many as six flowers are open at one time on a single stem. As a cut flower it is perfectly immense, lasting in water for over a week, the great flowers retaining their full size and coloring. 10 cts. each; \$1.00 a doz.

May. Lovely pure white flowers, finely flaked bright rosy crimson; strong spike; good forcing variety. 5 cts. each; 45 cts. per dozen.

GOLDEN QUEEN

Jung's American Hybrid Gladiolus.

The gorgeous colorings and gay markings of this mixture are simply grand. The large flowers are very brilliant and effective, of perfect form and heavy substance. Composed of the choicest named varieties, including the finest, showy, large flowering seedlings and latest introductions. All are of strong, healthy, upright growth and flowers are of immense size. 4 cts. each; 35 cts. per doz.; \$3.50 per 100.

CANNAS.

No class of plants ever offered has grown in popularity like these. They are very effective for bedding on the lawn, and equally good when grown as pot plants. They commence blooming soon after being planted out and flower profusely until stopped by frost. They multiply very rapidly and can be kept for years by following the instructions given with each order. They grow from 2½ to 5 feet high with heavy elegant foliage. Nothing will make a more beautiful or pleasing effect on your lawn than a bed of Cannas surrounded by a row of Salvias.

Brandywine.

This is undoubtedly the best of the bronze-leaved varieties. The color is an intense wine red, dappled with deep crimson. The petals are broad and sometimes edged with gold. It attains a height of from three to four feet. 15 cts. each; \$1.50 per doz.

Express.

Very early; grows about 2½ feet high. Color is a rich scarlet crimson. Foliage is a rich heavy green. An excellent variety for massing. 10 cents each; \$1.00 per dozen.

President McKinley.

Brilliant crimson with scarlet shading. It is of dwarf habit, growing only 2½ to 3 feet high. 10 cts. each; \$1.00 per dozen.

JUNG'S AMERICAN HYBRIDS

Premier.

A dwarf growing variety with deep crimson-red flowers bordered with yellow. 10 cents each; \$1.00 per dozen.

Alsace.

Delicate sulphur-yellow, changing to creamy white; planted in conjunction with the high colored sorts it makes a fine contrast. It grows about four and one-half feet high. 10 cts. each; \$1.00 per dozen.

Florence

Vaughan.

Bright, rich, golden yellow, spotted with red, of large size and perfect form; foliage green; grows four feet high. 10 cts. each; \$1.00 per dozen.

Pennsylvania.

Flowers measure fully six inches in diameter; color intense vermilion-scarlet overlaid with an orange sheen; grows six to seven feet high; foliage is a very rich green. 15 cts. each; \$1.50 per doz.

PENNSYLVANIA

As a special offer to get you started with our Cannas we will send one good strong root of each of the above seven beautiful varieties for 65 cents postpaid. Our bulbs will be ready for shipment about March 20.

How much does a good garden mean to you?

Afford to risk your garden by planting seed of unknown quality. **QUALITY SEED** and you will not be disappointed.

You can't afford to plant **"JUNG'S**

Gigantic "Orchid Flowered" Sweet Peas.

THE GIANTS OF THE SWEET PEA FAMILY.

These new Sweet Peas are of such enormous size, which, together with their charming colors and waved or fluted appearance, entitles them to be put in a class by themselves. The flowers are distinct in having the outer edges of the wings and standards waved or fluted as the tissue is so full that there is not room for it to lie flatly expanded or smoothly rolled. Some of the flowers grown on our farm measured two and one-fourth inches across. These grand Sweet Peas were the delight of everybody who saw them growing at Fairfield. The plants are very vigorous in growth and should stand at least eighteen inches apart.

Mrs. Routzahn Spencer.

A beautiful blending of soft straw color, tinted with blush pink and shading to apricot and rose at the edges, with quite a distinct rose margin. The flowers are of the largest size and are thoroughly crimped and waved. The standard is broad and deep; the wavy wings are so large that they usually hide the keel and are of the same soft color effect as the standard. The vines are strong and thrifty. The stems are twelve to fourteen inches long and seldom produce less than three flowers, while many vines bear four grand flowers to a spray. The large, beautifully formed flowers are so gracefully placed on the stems that they are sure to excite the greatest admiration. Pkt. 10 cts.

Dainty Spencer.

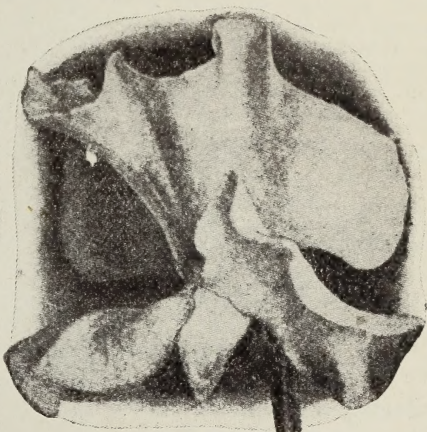

This new variety combines the giant fluted or waved flowers of the Spencer type with the delicate coloring of the original Dainty, being pure white edged with light pink. It is of immense size and its long stiff stems often bear four blossoms. One of the most beautiful Sweet Peas in existence today. The wings are unusually large and spreading. Pkt. 5 cts.; oz. 20 cts.

White Spencer.

It produces in the greatest profusion pure white flowers of large size. The standard measures one and three-quarter to two inches across by one and five-eighths inches in depth. The wings are fully an inch wide and nearly as deep as the standard. The flowers are borne three and four on a stem and are uniformly well placed. The vines are almost completely covered with blooms, while the flowers retain their large size throughout the season. Stems are extra long. Pkt. 5 cts.; oz. 20 cts.

Asta Ohn Spencer.

This is the very first lavender of the true Spencer type that has ever been introduced in America. The flowers are of large size, pronouncedly waved and

MRS. ROUTZAHN SPENCER

fluted in the standard, with unusually large, thoroughly waved wings. The stems are particularly long and sturdy and each stem uniformly bears four flowers. The color throughout both standard and wings is a charming soft lavender. It comes absolutely true to type. Pkt. 5 cts.; oz. 20 cts.

Apple Blossom Spencer.

Of true Spencer type. The flowers are heavily shaded and edged with deep rose and soft pink on silvery white. Like the original Apple Blossom, some flowers are deeper in color, on the same vine, than others. The form is very beautiful; the petals are waved or crinkled to a remarkable degree. The vines are very thrifty and the handsome flowers are borne in great profusion on long stiff stems, often four blossoms to a stem. Pkt. 5 cts.; oz. 20 cts.

Helen Lewis Spencer.

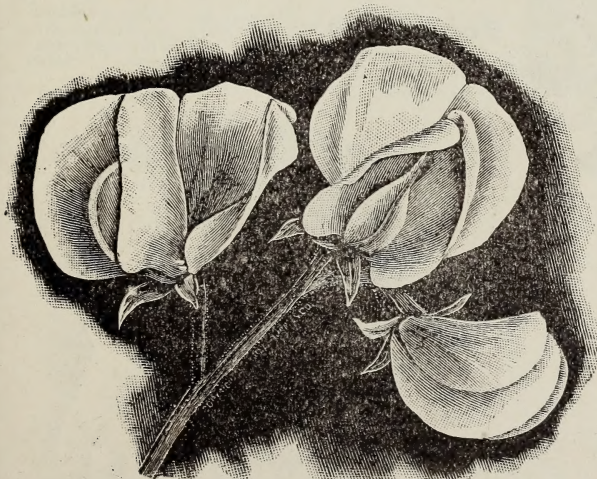

This is a grand seedling of Countess Spencer. It has the same wavy appearance, and bears four large blossoms to a single stem. Color is an intensely brilliant bright orange pink, and now supersedes all others in this shade on account of its size and long stems. The blossoms measure two inches across. Excellent for cut flowers. Pkt. 5 cts.; oz. 20 cts.

King Edward Spencer.

The king of all red Sweet Peas. The enormous flowers are frilled, waved and crinkled to a remarkable degree. The standard measures from 1½ to 2 inches across by 1½ inches deep. The unusually large wings make the flowers appear truly gigantic in size. The color is a deep rich glossy scarlet. It is the most beautiful of all Spencers. Pkt. 10 cts.; oz. 25 cts.

Earliest White.

The earliest White Sweet Pea. Comes into bloom in 45 days after sowing. The hardy vines are 16 to 20 inches tall, and bear a profusion of pure white flowers, which are of good size. Flowers are borne on stems 6 to 8 inches long, each stem having two or three well formed blossoms. Pkt. 5 cts.; oz. 20 cts.

EARLIEST WHITE

Jung's Gigantic "Orchid Flowered" Mixed Sweet Peas.

Never before has the public been enabled to secure such a superb mixture of truly giant flowered Sweet Peas at the low price of ten cents per packet.

The seed in this mixture was grown on the Fairfield Seed Farm under our strict supervision and can be relied upon to produce truly immense flowers. This mixture includes the very finest colors, such as "apricot and straw", delicate lavender, rich scarlet, pure white, and the finest shades of pink. The flowers are of extremely large size, beautifully waved or fluted on the standard, with well waved wings.

While the plants are strong vigorous growers and the flowers are borne in great profusion on long wiry stems, yet like all varieties of the true "Spencer" type they are shy seeders and for this reason the seed can never be produced cheaply. We can assure you, however, that after once growing this mixture you will never again want to sow the common varieties. Pkt. 10 cts.; oz. 25 cts.

Jung's Superfine Mixed Sweet Peas.

This mixture is absolutely unsurpassed.

It is not grown in mixture but is carefully blended of the finest large flowering varieties including some of the most beautiful recent introductions. For flowers of delicate colors, varying from pearly white to the richest reds and purples, this mixture leads, because it is the result of selecting, year after year, seeds of the choicest flowers. It will surely give satisfaction. Pkt. 5 cts.; oz. 10 c.; 1 lb. 20 c.

JUNG'S GIGANTIC ORCHID FLOWERED True Countess Spencer.

It combines all the good qualities of the best Sweet Pea. Color is a delightful soft pink shading a little deeper at the edge of the petals. Its size is larger than any other variety and at its best the standard is usually two inches across. Stems are very long and generally bear four blossoms, all facing one way. The edges of wings and standard are just wavy enough to give it a graceful fluffy appearance. It is fragrant, begins to bloom early, and continues until late in the season. Pkt. 5 cts.; oz. 20 cts.

The Greatest Sweet Pea Offer ever known. 25c.

For 25 cts. we will mail you any 6 packets of Sweet Peas listed in this catalogue—your own selection. We make this exceptional offer to induce you to try our Sweet Peas. After once trying them you will accept no others.

JUNG'S SUPERFINE MIXED

TRUE COUNTESS SPENCER

THREE UNUSUALLY FINE ASTERS.

Jung's New Aster "Fairfield".

A flower as grown on the Fairfield Seed Farm is shown on back cover.

We take pleasure in offering our customers this new Aster, which is in a class by itself. The flowers of this grand variety are immense, single flowers measure six inches across, and being borne on long stiff stems they rival Chrysanthemums as a flower for bouquets.

A BED OF THESE ASTERS LOOKS LIKE A SNOWDRIFT.

The petals of the huge flowers are very long, and are curled and twisted to such an extent as to make it by far the handsomest Aster known. We recommend it as the very best Aster, and are offering it at a very reasonable price. **Two colors, Glistening White and Delicate Shell-pink. Each 10 cts. per pkt.**

Jung's American Beauty.

This grand new Aster differs from all other varieties in width and substance of petals, some petals being almost a half inch wide.

It is almost identical in color to the popular American Beauty Rose, hence its name. It is a medium early bloomer. The plants are strong growers, from twenty-five to thirty inches tall, well supplied with heavy foliage, and is a prolific bloomer. Specimen plants carried from eight to twelve flowers, each of which measured over four inches across. The immense fluffy flowers are borne on stems from twelve to eighteen inches long. Excellent for cut flowers. For a large large pink aster American Beauty is in a class by itself. Pkt. 10 cts.

Violet King.

This is a popular variety, vigorous in growth, with long stiff stems, and luxuriant foliage of richest green. In form the flower is entirely distinct; petals resemble the quilled varieties, but are much larger and broader, those in the center being twisted, curled, and incurved, completely covering the crown. The bloom is round, full and very large, many of the flowers measuring from four to five inches across. The color is a soft violet-lilac. It blooms so evenly, the flowers have such lasting qualities, and continue so late in the season, that it is a veritable garden gem. It blooms continuously during the summer and early fall. Pkt. 10 cts.

Special Offer.

One pkt. of each, Fairfield White, American Beauty and Violet King for 20 cts., postpaid.
